## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Engineered and maintained **Java Spring Boot** microservices responsible for processing financial transactions, ensuring synchronous operation with core banking systems and achieving a **p95 latency of 180ms**.
- Developed **Python scripts** to automate data extraction and transformation for operational reporting, consolidating data from multiple sources into a unified format for analysis.
- Contributed to the design and development of **REST APIs** for cross-service data exchange, adhering to **secure coding practices** and integrating with internal and external systems.
- Managed production incidents for enterprise applications, performing **log analysis** with **Splunk** and **Dynatrace** to identify root causes and implement timely resolutions within strict SLAs.
- Collaborated with cross-functional teams in an **Agile/Scrum** environment, participating in sprint planning, daily stand-ups, and code reviews to deliver features and enhancements.
- Supported and integrated with enterprise **ERP** modules and operational platforms, coordinating **change-control management** for system configurations and post-go-live support.

## SKILLS

**Backend Development** – Java, Spring Boot, REST APIs, Microservices, Python, Flask, FastAPI

**Databases** – SQL, PostgreSQL, MySQL, Oracle, Database Querying, Data Warehousing

**Cloud & DevOps** – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD, Jenkins, Git

**Observability & Monitoring** – Splunk, Dynatrace, CloudWatch, Log Analysis

**Frontend Development** – React, Angular

**Data Analytics & BI** – Power BI, Tableau, DAX, Power Query, Data Modelling, R, RStudio

**Methodologies & Tools** – Agile, Scrum, Jira, Confluence, Linux Shell Scripting

## PROJECTS

### Real-time Transaction Monitoring Dashboard (HCL Technologies)

- Developed a **Java Spring Boot** backend service to ingest and process real-time transaction data from multiple financial message queues.
- Built asynchronous data pipelines using **Python** to aggregate and transform transaction status updates, feeding into a centralized dashboard.
- Designed and implemented **SQL queries** against a **PostgreSQL** database to support operational alerting and reconciliation workflows for failed payments.

### Automated Report Generation System (HCL Technologies)

- Created a suite of **Python scripts** to automate the generation of weekly operational reports from disparate data sources, reducing manual effort by approximately **15 hours per week**.
- Integrated the Python scripts with **Jenkins** to schedule regular execution and ensure timely delivery of reports to business stakeholders.
- Developed **Power BI dashboards** to visualize key performance indicators derived from the automated reports, enhancing decision-making for management.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
