PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot microservices** for new backend features, handling approximately **1,500 requests per second** during peak usage.
- Engineered **Python scripts** to automate data ingestion and transformation for operational reporting, reducing manual processing time by **40%**.
- Designed and implemented **RESTful APIs** for cross-system integrations, facilitating seamless data exchange between enterprise applications and a new client portal.
- Managed production support for enterprise applications, resolving P1/P2 incidents within SLA targets using **Splunk** and **Dynatrace** for proactive monitoring and root cause analysis.
- Contributed to the development of **LLM-driven summarization capabilities** for internal documentation, integrating with an existing knowledge base to provide concise overviews.
- Built and maintained **CI/CD pipelines** using Jenkins and Git, automating build, test, and deployment processes for microservices and reducing deployment cycle time by **30%**.

SKILLS

AI & IoT – LLMs, Generative AI, RAG, IoT Architectures, Device Management, Telemetry Ingestion, Event Processing, Smart Building Systems, Edge Computing

Backend Development – Java, Spring Boot, Microservices, RESTful APIs, Python, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Helm, CI/CD, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle, NoSQL

Data Analytics & ML – scikit-learn, PyTorch, TensorFlow, Hugging Face, Power BI, Tableau, DAX, Power Query, Data Modelling

System Design & Operations – Distributed Systems, Application Development, Operational Stability, System Design Artifacts, Troubleshooting, Logging, Observability (Splunk, Dynatrace)

PROJECTS

IoT Device Telemetry Ingestion Platform

- Developed a **Python-based ingestion service** on AWS Lambda to process real-time telemetry data from a fleet of **~5,000 IoT devices**, handling **~1,200 events per minute**.
- Designed a **data schema** for device status and health metrics, storing ingested data in **PostgreSQL** for downstream analysis and reporting.
- Integrated event processing logic to trigger alerts for device anomalies, reducing detection time for critical hardware failures by an average of **2 hours**.

Generative AI-Powered Content Summarization Tool

- Built a **Python application** integrating with a **Hugging Face LLM** to generate concise summaries of technical documentation and user guides.
- Developed a **REST API** using Flask for the summarization service, enabling integration with internal content management systems.
- Implemented a **RAG-style retrieval mechanism** to fetch relevant document chunks, improving summary accuracy by **18%** compared to abstractive summarization alone.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
