PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed and maintained **stock records** for high-value luxury items, ensuring precision across three retail locations using an **Electronic Stock Management System**.
- Monitored **daily sales** and transaction patterns, identifying and investigating unusual activity or payment methods to maintain data integrity.
- Resolved discrepancies in **stock items sold** incorrectly by liaising with shop floor staff and performing meticulous **data entry** to ensure accuracy.
- Executed weekly and monthly **stock counts**, preparing comprehensive reports and updates for directorial review to inform business decisions.
- Facilitated **cross-system integrations** via **REST APIs** and direct database flows to synchronize data between enterprise systems, supporting operational platforms.
- Automated routine reporting tasks using **Python scripting**, reducing manual data compilation time by approximately **20%** for weekly sales summaries.

SKILLS

Retail Operations – Stock Management, Sales Tracking, Stock Counts, Data Entry, Transaction Monitoring, Problem Solving

Data Analysis & Reporting – Power BI, Tableau, DAX, Data Modelling, Report Preparation, Data Visualization

Programming & Scripting – Python, Java, SQL, Spring Boot, Pandas, NumPy

Systems & Databases – PostgreSQL, MySQL, Oracle, Electronic Stock Management System, ERP Systems

Cloud & Infrastructure – AWS (EC2, S3, Lambda), Docker, Linux

Development Practices – Git, Jenkins, CI/CD, Agile/Scrum, Code Reviews

PROJECTS

Retail Sales & Stock Analysis Dashboard (HCL Technologies)

- Developed an interactive **Power BI dashboard** to visualize daily sales trends, stock levels, and transaction anomalies for a retail client.
- Implemented **data transformations** using Power Query to aggregate sales data from multiple sources, ensuring clean inputs for analysis.
- Designed **DAX measures** to track key performance indicators, including sales volume, average transaction value, and stock discrepancy rates.

Automated Inventory Reconciliation (HCL Technologies)

- Created a **Python script** to automate the reconciliation of inventory data between warehouse management and point-of-sale systems, processing ~1,500 records nightly.
- Wrote **SQL queries** against PostgreSQL databases to extract and compare stock movement logs, identifying discrepancies for further investigation.
- Integrated the script into a **Jenkins pipeline** for scheduled execution, reducing manual reconciliation effort by approximately **15 hours per month**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
