PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Owned end-to-end resolution of partner integration issues, consistently meeting defined **SLA targets** for inquiry response and resolution times across a portfolio of 5+ B2B SaaS clients.
- Investigated and resolved complex data mismatches and integration failures by analyzing **application logs**, writing intricate **SQL queries** against production PostgreSQL databases, and reproducing issues in staging environments.
- Implemented safe, scoped fixes including **configuration updates** and targeted **data corrections**, reducing critical incident recurrence by approximately **15%** on supported systems.
- Served as the primary technical triage point between customer-facing tools like **Intercom** and the engineering team, ensuring accurate escalation and context for ~50+ issues per month.
- Maintained a structured **voice-of-customer tracker**, identifying recurring patterns in integration failures and presenting findings to product teams, which contributed to the prioritization of 3 major systemic bug fixes.
- Contributed to the development of internal **runbooks and documentation**, enabling faster resolution of common issues and reducing average handler time by **20%** for tier-1 support queries.

SKILLS

Core Technologies – TypeScript, Node.js, .NET, PostgreSQL, REST APIs, OAuth, API Keys, Webhooks

Debugging & Observability – Log Analysis, Metrics, Tracing, Datadog, Grafana, CloudWatch, Sentry

Databases – SQL, PostgreSQL, MySQL, Oracle

Support & Escalation Tools – Intercom, Linear, Jira, Zendesk

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker

Development Practices – Agile, Scrum, Git, Code Reviews, CI/CD, Jenkins

PROJECTS

B2B SaaS Integration Support Platform

- Developed a Python-based internal tool to automate the retrieval and initial analysis of application logs and database states for common integration failure scenarios, reducing manual investigation time by up to **40%**.
- Implemented automated checks for API request/response validation and webhook delivery success rates, flagging potential issues before they impacted end-users for a suite of 10+ partner integrations.
- Designed and documented escalation pathways for critical incidents, ensuring clear handoffs between support tiers and engineering teams, and contributing to a **10%** faster resolution time for P1 issues.

Partner Issue Triage & Root Cause Analysis

- Modeled common integration error patterns and developed diagnostic queries in SQL to quickly identify root causes for data discrepancies between partner systems and the core platform.
- Reproduced complex edge-case bugs reported by enterprise partners in a dedicated staging environment, providing detailed steps and supporting data for the engineering team to implement fixes.
- Authored comprehensive post-incident review reports, detailing the timeline, impact, root cause, and remediation steps for critical integration failures, which informed future system design.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
