PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Engineered **Python**-based ML pipelines on **AWS Lambda** to process approximately 3,500 events per second, replacing a less efficient batch job and supporting downstream ML scoring.
- Designed and implemented containerized **FastAPI** applications packaging **Hugging Face models**, deploying them onto a **managed Kubernetes service** for experimental computer vision workloads.
- Collaborated with data science teams to integrate new experimental **computer vision pipelines** into existing labelling workflows, ensuring data consistency for underwriting analysis.
- Developed and maintained **CI/CD pipelines** within **Jenkins**, actively participating in code reviews and enhancing team coding standards through pull request feedback.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and ensuring adherence to SLAs in a high-availability environment.
- Supported and integrated with enterprise business systems, coordinating change-control management for system updates and post-go-live support across interconnected platforms.

SKILLS

MLOps & Deployment – Hugging Face models, FastAPI, Kubernetes, containerization, CUDA, NVIDIA drivers, EC2 GPU instances, ML pipelines, MLOps

Cloud & Infrastructure – AWS, Lambda, EC2, S3, CloudWatch, managed Kubernetes service, Linux, shell scripting

Programming & Scripting – Python, Java, Spring Boot, REST APIs, R, DAX, Power Query

Databases & Data – SQL, PostgreSQL, MySQL, Oracle, data modelling, data warehousing, ETL

CI/CD & Version Control – Jenkins, Git, code reviews, Agile, Scrum, Jira, Confluence

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

Analytics & Visualization – Power BI, Tableau, scikit-learn, pandas, NumPy, RStudio

PROJECTS

Containerized Computer Vision API Deployment

- Packaged a **Hugging Face computer vision model** into a **FastAPI** service, enabling efficient inference for image analysis tasks.
- Configured **Docker** containers and managed dependencies for the model API, ensuring compatibility with **CUDA** and **NVIDIA drivers** on **EC2 GPU instances**.
- Deployed the containerized API to a **managed Kubernetes service**, supporting experimental underwriting analysis pipelines and integrating with existing data workflows.

Automated Data Pipeline for Analytics

- Developed a **Python**-based ETL pipeline on **AWS Lambda** to ingest and transform data from multiple sources, processing approximately 3,200 events per second.
- Implemented robust error handling and logging mechanisms using **CloudWatch**, ensuring data integrity and facilitating quick issue resolution in production.
- Integrated the pipeline with downstream analytical systems, providing cleaned and structured data for model training and reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
