PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Assisted in maintaining and monitoring **AWS** infrastructure, including **EC2** and **S3**, under senior engineer guidance to improve system availability.
- Supported the enhancement of **CI/CD pipelines** using **Jenkins**, contributing to automated build, test, and deployment processes for enterprise applications.
- Wrote and maintained **Python** automation scripts to streamline data processing tasks, reducing manual effort for scheduled reporting by approximately **40%**.
- Contributed to the administration and support of **Linux**-based production systems, analyzing logs and resolving incidents within defined SLA targets.
- Participated in incident response and troubleshooting efforts for production systems, documenting resolutions and contributing to post-incident reviews.
- Collaborated with cross-functional teams to gather requirements and support User Acceptance Testing (UAT) for system configuration updates and new feature rollouts.

SKILLS

Cloud Infrastructure – AWS (EC2, S3, Lambda, CloudWatch)

Containerization – Docker, Kubernetes (EKS/AKS)

CI/CD – Jenkins, Git

Scripting & Automation – Python, PowerShell, Bash

Operating Systems – Linux, Windows (IIS, .NET)

Infrastructure as Code – Terraform, CloudFormation

Observability & Monitoring – CloudWatch, Prometheus, Grafana

PROJECTS

Automated Incident Response Framework (HCL Technologies)

- Developed a **Python**-based framework to automate initial incident triage and data gathering for critical production systems, reducing average response time for P1 incidents by approximately **18%**.
- Integrated the framework with **Splunk** for log analysis and **Jira** for ticket creation, standardizing incident reporting and accelerating escalation processes.
- Designed and implemented basic alerting mechanisms within the framework to notify on-call engineers of recurring error patterns detected in system logs.

Production System Monitoring Dashboard (HCL Technologies)

- Engineered and maintained operational dashboards using **Python** and data visualization libraries to monitor key performance indicators (KPIs) for enterprise applications.
- Configured data pipelines to ingest metrics from **AWS CloudWatch** and application logs, enabling real-time performance tracking for a team of 8 engineers.
- Collaborated with business analysts to define critical metrics for the payments operations dashboard, ensuring alignment with operational objectives.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
