PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Evaluated and integrated emerging **AI technologies**, running rapid proofs-of-concept for new LLM approaches and agentic deployment frameworks, transitioning successful experiments to production-ready capabilities.
- Developed and deployed repeatable, **infrastructure-as-code** patterns using **Crossplane** across **AWS** and **Azure** to productionise chosen AI capabilities, ensuring smooth handoff to platform teams.
- Configured and directed **AI coding agents** such as GitHub Copilot and Claude Code, ensuring technical alignment with new technologies and adherence to enterprise standards.
- Acted as a subject-matter expert in **memory and retrieval** systems, coaching peers across the AI CoE and presenting findings on emerging AI technology domains.
- Designed and implemented **Python**-based data pipelines for ETL and scheduled reporting, processing approximately **5,000 data records daily** for enterprise business systems.
- Supported production environments for enterprise Java/.NET applications, managing SLAs and responding to P1/P2 incidents with a focus on system reliability and observability using **Splunk** and **Dynatrace**.

SKILLS

AI Engineering – LLM integration, prompt engineering, retrieval-augmented generation (RAG), agent frameworks, function calling, evaluation, observability, AI safety, guardrails, Model Context Protocol (MCP)

Cloud Platforms – AWS, Azure, GCP

Infrastructure as Code – Crossplane, Terraform, Pulumi, CDK

Programming Languages – Python, TypeScript, Rust, Go, Java

Software Development – REST APIs, Spring Boot, CI/CD, Git, Docker, Linux

Data & Analytics – SQL, PostgreSQL, MySQL, Oracle, Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

PROJECTS

AI Agent Orchestration Framework (HCL Technologies)

- Developed a Python-based framework for orchestrating AI agents, integrating with **Claude Code** and **GitHub Copilot** for automated code generation and review tasks.
- Implemented robust prompt engineering strategies and a **retrieval-augmented generation** (RAG) system to provide agents with relevant contextual information, improving output accuracy by approximately **20%**.
- Designed and deployed the framework on **AWS Lambda**, enabling scalable execution and monitoring of agent workflows, handling an average of **150 agent requests per hour**.

Production System Observability Dashboard (HCL Technologies)

- Built an interactive **Power BI** dashboard to consolidate operational metrics and alerts from multiple enterprise Java/.NET applications.
- Integrated data from **Splunk** and **Dynatrace** using **Power Query**, enabling real-time transaction monitoring and performance analysis for a team of **8 operations engineers**.
- Refined data models and DAX measures to provide actionable insights into system health, reducing average incident triage time by an estimated **15%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
