PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **backend services and APIs** using **TypeScript** and **NestJS**, supporting data access and computation for risk analytics applications.
- Implemented **front-end mathematical computations** for exposure analysis and loss projections within a **React**-based client experience, validating results against actuarial models.
- Engineered **scalable data pipelines** on AWS using **Python** and **SQL** to curate data layers that power insurance recommendations, processing approximately **4,500 events per hour**.
- Owned end-to-end feature development from data consumption in a **Databricks lakehouse** environment to client-facing UI, minimizing handoffs and increasing team autonomy by an estimated **15%**.
- Integrated **AI tooling**, including code generation assistants, into the daily development workflow, improving code quality and reducing average development time for new features by **18%**.
- Collaborated with business analysts and operations teams to translate ambiguous requirements for insurance risk management into implementable software solutions, delivering **3 major feature releases**.

SKILLS

Languages – TypeScript, Python, SQL, Java, R

Backend Frameworks – Node.js, NestJS, Spring Boot, Flask, FastAPI

Frontend Frameworks – React, Angular

Data Platforms & Tools – Databricks, PostgreSQL, MySQL, Oracle, Power BI, Tableau, Power Query, DAX

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

AI & ML – Scikit-learn, NumPy, Pandas, AI-enabled development, Actuarial Computation

PROJECTS

Digital Client Experience Platform (Marsh)

- Built a **React-based user interface** to visualize insurance exposure data and present risk analytics, incorporating interactive charts and data grids.
- Developed **Node.js APIs** with **NestJS** to serve curated data from a **Databricks lakehouse**, enabling real-time calculations for premium impact analysis.
- Implemented **AI-assisted development practices**, using tools like GitHub Copilot to accelerate feature development and automate unit test creation, resulting in a **20% reduction** in development cycle time for the project.

Insurance Risk Analytics Dashboard (HCL Technologies)

- Engineered **Python data pipelines** to ingest and transform complex insurance policy data from various sources into a structured format suitable for analytics.
- Designed and built **Power BI dashboards** with **DAX measures** to provide stakeholders with insights into risk exposure and loss projections, facilitating data-driven decision-making.
- Developed **SQL queries** against a **PostgreSQL** database to validate data accuracy and extract specific datasets for reporting and model input, supporting an **8-person analytics team**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
