PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Python** scripts for automating data ingestion and ETL processes, reducing manual data preparation effort by approximately 30%.
- Contributed to the design and implementation of **Java Spring Boot** REST APIs for internal services, focusing on request validation and efficient data exchange.
- Supported the deployment and operation of **ML models** in production environments, assisting in debugging and performance monitoring of inference services.
- Collaborated with data scientists to translate **ML models** from development into production-ready solutions, participating in feature engineering and experimentation.
- Engineered **Python** data pipelines on **AWS Lambda** to process ~3,500 events per second, replacing a less efficient scheduled batch job for real-time data flows.
- Participated in preparing data, performing feature engineering, and supporting experimentation workflows for applied AI solutions under senior guidance.

SKILLS

AI/ML Engineering – Machine Learning, MLOps, AI Systems, Inference Services, Feature Engineering, Model Deployment, Data Pipelines, Experimentation Workflows

Programming Languages – Python, Java, SQL

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Observability & Tools – Splunk, Dynatrace, Jira, Confluence

PROJECTS

Production ML Inference Service (HCL Technologies)

- Built and maintained a **Python**-based inference service for a **scikit-learn** fraud detection model, processing approximately 400 requests per minute.
- Integrated the service with a **PostgreSQL** database for real-time feature lookups, ensuring low-latency responses for downstream decisioning.
- Developed unit and integration tests, contributing to a **CI/CD pipeline** managed via Jenkins, to ensure service reliability and rapid deployment cycles.

Automated Data Pipeline for Financial Operations (HCL Technologies)

- Developed **Python** scripts to automate the extraction, transformation, and loading (ETL) of transaction data from **Oracle** and **PostgreSQL** databases.
- Created scheduled reporting jobs using **Linux cron**, generating daily summaries of payment processing metrics for operational teams.
- Implemented data validation checks within the pipeline, reducing data quality issues in downstream operational dashboards by an estimated 15%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
