## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Automated common technical support requests using **Python scripting**, reducing manual intervention by ~**35%** and improving response times for critical issues.
- Provided technical support to market-facing and infra teams, guiding them on leveraging infrastructure for enhanced application stability and performance.
- Managed on-call duties, responding to support requests and incidents related to runtime infrastructure and security systems, ensuring swift resolution and system health.
- Collaborated with development teams to address security vulnerabilities, implementing fixes and enhancing system security posture within the production environment.
- Engineered improvements to the on-call support process by refining workflows and automating common problem resolution, enhancing customer experience.
- Performed regular maintenance tasks, including system updates and configuration changes, on enterprise systems to ensure optimal operation and reliability.

## SKILLS

**Cloud & Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch), Linux, Docker, Jenkins, Terraform, Atlantis

**Programming & Scripting** – Python, Shell, Java, Spring Boot, C#

**Databases** – MySQL, Oracle, SQL Server, PostgreSQL, Hive, Impala

**Big Data & Analytics** – Hadoop, Spark, Databricks, Nifi, Oozie, Sqoop, Airflow

**Developer Tools** – Git, Jira, Confluence, Splunk, Dynatrace, Nessus, Hashicorp Vault

**Methodologies** – Agile, Scrum, CI/CD

## PROJECTS

### Automated Incident Response Tooling (HCL Technologies)

- Developed a **Python-based automation suite** to streamline the triage and initial response for production incidents, integrating with **Splunk** for log analysis and **Jira** for ticket management.
- Implemented automated diagnostic scripts that gathered key system metrics and error logs, reducing average incident resolution time by **18%** for common P1/P2 issues.
- Designed and built a centralized dashboard using **Flask** to provide real-time status updates on ongoing incidents and automated remediation progress for operations teams.

### System Health Monitoring and Alerting (HCL Technologies)

- Enhanced monitoring capabilities for enterprise applications by configuring and optimizing **Dynatrace** alerts, capturing critical performance indicators and error patterns.
- Created custom shell scripts to perform automated health checks on Linux servers and report anomalies, ensuring proactive identification of potential system issues.
- Integrated monitoring alerts with a notification system, reducing the time to detect system degradations from hours to under **15 minutes**.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
