PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and integrated **AI services** into a component-based system using **Python**, enabling advanced data processing capabilities for the ScholarAI project.
- Constructed intuitive, high-quality user interfaces with **React** and **Next.js**, incorporating solid design sensibilities to enhance user experience and product usability.
- Authored **PHP** backend code and scripts to support AI model integration and data orchestration, ensuring efficient communication between frontend and backend components.
- Collaborated with research teams to define and implement technical requirements for novel AI features, translating complex needs into actionable development tasks.
- Designed and implemented **REST APIs** using **Java Spring Boot** for seamless data exchange between disparate application modules, improving system interconnectivity.
- Managed production environments for enterprise applications, responding to P1/P2 incidents and performing root cause analysis with tools like **Splunk** and **Dynatrace**.

SKILLS

Frontend – React, Next.js, UI/UX Design

Backend – PHP frameworks, Python, Java Spring Boot, REST APIs

AI & Integration – AI services integration, Machine Learning, Data Analytics

Databases – PostgreSQL, MySQL, Oracle, SQL

Cloud & DevOps – AWS (EC2, S3, Lambda), Docker, Jenkins, Git

Observability – Splunk, Dynatrace, CloudWatch

Methodologies – Agile, Scrum

PROJECTS

ScholarAI Frontend Integration (HCL Technologies)

- Built interactive user interfaces for the ScholarAI research platform using **React** and **Next.js**, focusing on responsive design and intuitive navigation.
- Integrated AI-driven content generation features into the frontend, displaying results from backend services in a user-friendly format.
- Developed reusable UI components that improved development speed by an estimated **15%** across feature implementation cycles.

AI Data Pipeline and Orchestration (HCL Technologies)

- Engineered Python scripts to automate data ingestion and pre-processing for AI model training, handling approximately **50 GB** of research data daily.
- Developed **RESTful APIs** in **Python (Flask)** to serve processed data to frontend applications and other backend AI services.
- Implemented scheduled jobs using cron on Linux to maintain data pipeline integrity and ensure timely availability of training datasets.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
