PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** RESTful APIs for cross-service data exchange, incorporating request validation and circuit breaker patterns to enhance system resilience.
- Developed and maintained **Python** automation scripts for data extraction, transformation, and loading (ETL) processes, supporting scheduled reporting for operational teams.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, adhering to strict Service Level Agreements (SLAs) and resolving P1/P2 issues within defined response times.
- Collaborated with cross-functional teams, including program managers and designers, to deliver complete feature areas from conception through to shipping, ensuring architecture and design alignment.
- Authored clean, maintainable code in **Java** and **Python** with a focus on quality, performance, and scalability, contributing to the long-term supportability of large-scale solutions.
- Provided mentorship to junior engineers, guiding them in identifying and proposing appropriate technical solutions and fostering best practices in development and debugging.

SKILLS

Languages – Java, Python, TypeScript, C#, C/C++

Web Technologies – Spring Boot, Node.js, .NET, RESTful APIs, HTTP, SOAP, MVC

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

Development Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile, Scrum, CI/CD

Observability & Automation – Splunk, Dynatrace, Linux Shell Scripting

Data & Analytics – Power BI, Tableau, DAX, Power Query, pandas, NumPy, scikit-learn, R

PROJECTS

Enterprise Systems Integration & Automation Suite

- Engineered a **Python**-based ETL pipeline to ingest and transform data from disparate enterprise systems, including ERP modules, into a unified format for reporting and analysis, processing approximately **50,000 records** daily.
- Developed **Java Spring Boot** microservices to expose key business system data via **REST APIs**, facilitating seamless integration with downstream applications and improving data accessibility by **30%**.
- Automated routine data validation and reconciliation checks using shell scripts and SQL queries on **PostgreSQL**, reducing manual effort by an estimated **15 hours per week**.

Customer Operations Dashboard Enhancement

- Designed and implemented interactive dashboards in **Power BI** to visualize key performance indicators for customer operations, enabling stakeholders to monitor transaction flows and identify bottlenecks.
- Wrote complex **DAX** measures and utilized **Power Query** for data transformation and modelling, consolidating data from multiple sources into a cohesive reporting structure.
- Collaborated with business analysts to gather requirements for operational alerting, translating needs into configurable rules within the dashboard to flag nearly **2,800** anomalous transactions weekly.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
