PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed **Python** integrations for **streaming platforms** and **distributed systems**, processing approximately 4,000 events per second during peak loads.
- Engineered and enhanced **REST APIs** within a **containerized environment** to provide critical access to financial datasets for operations teams.
- Designed and implemented **data architecture components** for centralizing data definitions, collaborating with stakeholders on data governance policies.
- Implemented **distributed workflows** using **Python** to coordinate complex business processes across disparate financial systems, improving process reliability by **15%**.
- Participated in **Agile/Scrum** ceremonies, contributing to sprint planning and collaborating with cross-functional teams to meet development goals.
- Supported production applications by integrating **automated testing** at multiple levels, adopting a **DevOps mindset** to improve system stability and deployment frequency.

SKILLS

Programming Languages – Python, Java, SQL, R, JavaScript

Frameworks & Libraries – Spring Boot, Flask, FastAPI, pandas, NumPy, scikit-learn, Angular, React

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes, Terraform

Databases – PostgreSQL, MySQL, Oracle, Data Warehousing

Integration & Messaging – REST APIs, Kafka

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

Domain Knowledge – Financial Services Operations, Portfolio Accounting, Corporate Accounting, Tax Reporting, Back Office Systems

PROJECTS

Financial Data Integration Platform (HCL Technologies)

- Built **Python**-based integration services to ingest and process financial transaction data from multiple sources into a central data lake on **AWS S3**.
- Developed **REST APIs** using **Flask** to expose curated datasets to downstream analytics and reporting tools, handling an average of **500 requests per minute**.
- Implemented **distributed task queues** using Celery and Redis to manage batch data processing and reconciliation workflows, reducing manual intervention by **30%**.

Real-Time Transaction Monitoring System (HCL Technologies)

- Engineered a **Python** application to consume real-time transaction streams from a **Kafka** topic, performing immediate validation and enrichment.
- Developed **alerting mechanisms** that triggered based on pre-defined business rules, reducing the average detection time for critical transaction anomalies by **45 minutes**.
- Deployed the system within a **Docker container** on **AWS EC2**, integrating with **Splunk** for comprehensive log analysis and operational insights.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
