PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Analyzed mapped processes and operational procedures for a financial services client, identifying **control gaps** and areas for enhancement in transaction monitoring workflows.
- Performed gap analysis between current process maps and procedure documents, ensuring alignment and identifying deviations from desired future states for **payments operations**.
- Developed and presented recommendations for process improvements and operational change to stakeholders, focusing on enhancing efficiency in **financial-services dashboards**.
- Collaborated with cross-functional teams, including operations and business analysts, to support the implementation of process changes and monitor their impact on system reliability.
- Assessed changes to ensure compliance with industry regulations and organizational standards, contributing to the maintenance of **audit trails** and **GDPR-aware** production environments.
- Documented working papers and incident reports in a concise and clear manner, supporting **SLA management** and P1/P2 incident response for enterprise applications.

SKILLS

Process Analysis & Controls – Process Mapping, Operational Procedures, Control Gaps, Gap Analysis, Risk Assessment, Compliance Controls, Business Process Documentation, Technical Writing

Financial Services Operations – Payments Operations Dashboard, Transaction Monitoring, Reconciliation Workflows, Operational Alerting, Financial Message Flows, Regulatory Awareness

Software Development – Java, Spring Boot, REST APIs, Python Scripting, ETL, Automation, SQL (PostgreSQL, MySQL, Oracle)

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD

Monitoring & Support – Splunk, Dynatrace, Linux Shell Scripting, Log Analysis, Incident Response, Change Management

Business Intelligence & Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Visualisation

Project Management & Collaboration – Agile/Scrum, Jira, Confluence, Stakeholder Engagement, Requirements Gathering, UAT Support

PROJECTS

Financial Services Operations Dashboard Enhancement

- Enhanced a **payments operations dashboard** by developing Python scripts to automate data aggregation from multiple SQL sources (PostgreSQL, Oracle), reducing manual reporting time by ~30%.
- Implemented new alerting mechanisms within the dashboard using **Java Spring Boot** to monitor transaction flows and notify operations teams of an average of 75 failed payment messages per day.
- Refined data validation routines and query performance for key operational reports, ensuring data accuracy for reconciliation workflows and audit trail generation.

Enterprise Business Systems Integration Analysis

- Analyzed cross-system integrations between ERP modules and operational platforms, documenting data flows via **REST APIs** and direct database connections (MySQL, PostgreSQL) for improved system understanding.
- Supported change-control management for system configuration updates by coordinating UAT efforts and analyzing impact on interconnected systems, ensuring smooth post-go-live transitions.
- Developed shell scripts on **Linux** to automate log analysis for troubleshooting integration issues, reducing issue resolution time by approximately 15% for common problems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore,
India**

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
