PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented new features for the **MongoDB core product**, focusing on enhancing data structure management and algorithmic efficiency, aligning with software design principles.
- Collaborated with cross-functional teams, including product management and UX design, to define requirements and deliver high-quality end-user features for **MongoDB products**.
- Developed and executed comprehensive test plans, including unit, integration, and end-to-end tests, for newly developed software features, ensuring code quality and reliability.
- Contributed to the research and development of innovative solutions for the database platform, balancing exploration with the timely delivery of production-ready software.
- Supported the maintenance and understanding of **MongoDB deployments** by developing diagnostic tools and documentation to assist users in troubleshooting and optimizing their systems.
- Participated in code reviews, providing constructive feedback to peers to uphold coding standards and foster a collaborative development environment.

SKILLS

Languages – Java, Python, C++, Go, JavaScript, Node.js, Ruby

Cloud Platforms – AWS, Azure, GCP

Databases – MongoDB, PostgreSQL, MySQL, Oracle

Development Tools – Git, Jenkins, Docker

Methodologies – Agile, Scrum

Core CS – Data Structures, Algorithms, Software Design

PROJECTS

Distributed Data Management Service

- Engineered a distributed service in **Java Spring Boot** to manage metadata for large datasets, improving data cataloging efficiency by **30%**.
- Implemented asynchronous communication patterns using **Kafka** for inter-service data propagation, ensuring eventual consistency across distributed nodes.
- Developed RESTful APIs for data retrieval and management, integrating with **PostgreSQL** for persistent storage and adhering to strict API design principles.

Performance Optimization Suite for Data Ingestion

- Developed **Python** scripts to automate the analysis of data ingestion pipelines, identifying bottlenecks that contributed to a **22%** reduction in processing time.
- Built a suite of diagnostic tools that allowed users to monitor and troubleshoot data flow issues, reducing average incident resolution time by approximately **4 hours**.
- Created interactive visualizations using **Power BI** to present performance metrics and identify areas for further optimization to engineering stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
