PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Python** scripts to automate data extraction and transformation tasks for operational reporting, reducing manual effort by approximately **40%**.
- Developed and maintained **Java Spring Boot** REST APIs for system integrations, handling approximately **3,000 requests per day** and ensuring seamless data flow between enterprise applications.
- Managed production support for enterprise applications, responding to P1/P2 incidents and performing log analysis using **Splunk** and **Dynatrace** to maintain service level agreements.
- Contributed to **CI/CD** pipeline enhancements using **Jenkins** and **Git**, improving code deployment frequency and reliability for development teams.
- Executed complex **SQL** queries and performed data validation across **PostgreSQL** and **Oracle** databases for ad-hoc reporting and system integration requirements.
- Collaborated with cross-functional teams to support enterprise business systems, including coordination for change control management and post-go-live triaging.

SKILLS

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Warehousing

Methodologies – Agile, Scrum

PROJECTS

Automated Reporting System for Enterprise Data

- Developed a **Python**-based ETL pipeline to ingest and process data from disparate sources (e.g., **PostgreSQL**, flat files) into a centralized data warehouse.
- Created automated daily and weekly reports using **Power BI**, visualizing key operational metrics for business stakeholders and reducing manual report generation time by **~35%**.
- Implemented data validation checks within the pipeline to ensure data integrity and accuracy before report generation, addressing approximately **50 unique data quality issues** per month.

Financial Transaction Monitoring Dashboard Enhancement

- Engineered **Java Spring Boot** microservices to process and enrich high-volume transaction data streams, contributing to an operational dashboard.
- Designed and implemented **SQL** procedures for efficient data aggregation and querying on **PostgreSQL**, enabling near real-time monitoring of transaction flows.
- Integrated monitoring alerts into a centralized system using **Splunk**, reducing the mean time to detect for critical transaction processing issues by **15%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
