PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided day-to-day operational support for a financial services dashboard, monitoring and resolving an average of **150+ inbound queries** weekly across multiple mailboxes.
- Developed and maintained operational management information (MI), including **10+ key performance indicators** and trend reports, proactively identifying risks and recurring issues.
- Supported the development and delivery of operational services by updating procedures and coordinating **quality assurance activities**, including user access checks for a 500+ user platform.
- Documented and mapped business processes for a payments operations dashboard, contributing to continuous improvement initiatives that reduced incident resolution time by **18%**.
- Collaborated with business analysts and operations teams to gather requirements, support User Acceptance Testing (UAT), and triage post-implementation issues for enterprise systems.
- Engineered Python scripts to automate data extraction and transformation for scheduled reporting, processing approximately **50,000 records** per run to support operational decision-making.

SKILLS

Operations & Support – Operational Support, Stakeholder Management, Incident Resolution, Quality Assurance, Process Improvement, UAT Coordination, Business Process Governance, Knowledge Transfer

Business Analysis & Reporting – Management Information (MI), KPIs, Dashboards, Trend Reporting, Process Mapping, Requirements Gathering, User Guidance

Digital & Development Support – Agile Methodologies, Sprint Support, Defect Management, Post-Release Validation, Documentation

Core Technologies – Microsoft Excel, Microsoft Word, Microsoft PowerPoint, Jira, Confluence, Git, Jenkins

Data & Automation – Python Scripting, ETL, Data Pipelines, SQL (PostgreSQL, MySQL, Oracle), Scheduled Reporting

Infrastructure & Cloud – AWS (EC2, S3, Lambda, CloudWatch), Linux, Docker

PROJECTS

Payments Operations Dashboard Enhancement (HCL Technologies)

- Enhanced a payments operations dashboard by developing new Python-based ETL scripts to ingest and process transaction data from disparate sources, improving data freshness for monitoring.
- Built interactive **Power BI dashboards** to visualize key operational metrics and transaction flow status, enabling business stakeholders to quickly identify bottlenecks and performance issues.
- Documented system architecture and operational runbooks for the dashboard, facilitating smoother handover to the L2 support team and reducing onboarding time for new engineers by **30%**.

Automated Reporting System for Enterprise ERP (HCL Technologies)

- Developed a suite of Python scripts to automate the generation of daily and weekly operational reports from an enterprise ERP system, replacing manual data compilation efforts.
- Integrated with **PostgreSQL and Oracle databases** to extract and validate data, ensuring accuracy and consistency across all generated reports for business unit review.
- Implemented a CI/CD pipeline using **Jenkins** for automated testing and deployment of reporting script updates, reducing manual deployment overhead by an estimated **4 hours** per release cycle.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
