PROJECTS

Platform Feature Development for Workforce Certification

- Developed core backend features and RESTful APIs using **Python** and **Java Spring Boot** to support the new certification and assessment platform.
- Implemented frontend components and user interfaces with **React** and **TypeScript**, focusing on maintainability and user experience for regulated industries.
- Participated in daily stand-ups, code reviews, and sprint planning, ensuring code quality and adherence to modern software engineering practices.

Automated Reporting and Data Pipeline

- Created automated data pipelines using **Python** and **SQL** to extract and transform data from enterprise systems, generating daily operational reports.
- Designed and implemented a Power BI dashboard to visualize key performance indicators from the processed data, enabling stakeholders to track system health and identify trends.
- Managed the deployment and monitoring of Python scripts on AWS Lambda, ensuring reliable execution for scheduled data processing tasks.
