PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Liaised between business, IT, and QA teams to define and deliver technical solutions for payment processing requirements, ensuring alignment on project scope and deliverables.
- Translated business requirement documents into detailed technical specifications, providing domain expertise for the development of new payment system features and enhancements.
- Participated in User Acceptance Testing (UAT) cycles, analyzing and resolving technical issues identified during development and post-implementation phases for financial operations.
- Collaborated with cross-functional teams, including product SMEs and solution architects, to deliver integrated payment solutions and provide walk-throughs of complex requirements.
- Managed incident response for critical production systems supporting financial services operations, adhering to strict SLAs and conducting root cause analysis for P1/P2 incidents.
- Developed and maintained Python scripts to automate data ingestion and ETL processes for operational reporting, improving data processing efficiency by approximately 15%.

SKILLS

Domain Expertise – Banking Domain, Payments Processing, Low Value Payments, High Value Payments, Regulatory Compliance

Technical Skills – SQL, Oracle Databases, Microservice Architecture, Database Scripting, System Integration

Payment Technologies – ISO 20022, EMV, Tokenization

Development & Support – Java Spring Boot, Python, REST APIs, Production Support, Incident Management

Cloud & DevOps – AWS (EC2, S3, Lambda), Docker, Jenkins, Git

Tools & Methodologies – Jira, Confluence, Agile, Scrum, Splunk, Dynatrace

Data Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling, R, pandas, NumPy

PROJECTS

Financial Services Transaction Monitoring Dashboard (HCL Technologies)

- Developed a Java Spring Boot-based dashboard to monitor real-time transaction flows for a financial services client, enhancing visibility into payment processing operations.
- Implemented automated alerting mechanisms using Python scripts that flagged approximately 3,200 failed or stuck payment messages per week, reducing manual oversight by 25%.
- Integrated with production databases (PostgreSQL, Oracle) to extract and display key operational metrics, supporting reconciliation workflows and audit trail requirements.

Automated Payment Reconciliation System (HCL Technologies)

- Engineered a Python-based system to automate reconciliation workflows between multiple financial systems, reducing manual reconciliation time for a key operational process by 40%.
- Designed and implemented REST APIs for data exchange between the reconciliation system and upstream/downstream enterprise applications, ensuring seamless data flow.
- Supported the deployment and monitoring of the system on AWS EC2 instances, ensuring stability and performance through daily log analysis and system checks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
