PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed production monitoring and error analysis for enterprise applications, responding to P1/P2 incidents and ensuring SLA adherence across **Splunk** and **CloudWatch**.
- Developed Python scripts to automate ETL processes and generate scheduled operational reports, streamlining data aggregation for business analysts.
- Engineered **Java Spring Boot** REST APIs to support cross-system integrations, focusing on bug fixes and feature enhancements within existing microservices.
- Performed ad-hoc data validation and schema modifications using **SQL** across **PostgreSQL** and **Oracle** databases for reporting and system integration needs.
- Authored and approved complex knowledge articles for a shared team knowledge base, improving self-service resolution rates for common product issues.
- Participated in on-call rotations and weekend support shifts, maintaining composure under pressure to resolve critical customer-facing issues.

SKILLS

Support & Operations – Production Monitoring, Error Analysis, Incident Response, SLA Management, On-Call Rotation, Troubleshooting, Customer Support, Knowledge Base Management

Programming Languages – Python, Java, SQL, Bash Scripting

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Databases – PostgreSQL, MySQL, Oracle

DevOps & Tools – Git, Jenkins, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Customer Issue Triage and Resolution Platform (HCL Technologies)

- Developed a Python-based tool to parse logs from **Splunk** and **Dynatrace**, automatically correlating error messages and generating incident summaries for faster triaging.
- Implemented REST API integrations using **Java Spring Boot** to pull system health metrics from various enterprise applications, feeding into a central monitoring dashboard.
- Collaborated with operations teams to define alert thresholds and notification rules, reducing false positives by approximately **30%** and improving response times for critical alerts.

Automated Reporting and Data Validation Suite (HCL Technologies)

- Created a suite of Python scripts to automate the generation of weekly and monthly operational reports from disparate data sources, including **PostgreSQL** and flat files.
- Designed and implemented SQL queries for data validation checks, ensuring data integrity before report generation and identifying data discrepancies of up to **15%** in source systems.
- Built a scheduling mechanism using **Linux cron jobs** to ensure timely execution of all reporting tasks, delivering reports consistently by the 2nd business day of each period.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
