## PROFESSIONAL EXPERIENCE

---

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed production incidents for enterprise applications, performing detailed technical analysis and troubleshooting across product functionality and system configurations to resolve P1/P2 issues within SLA targets.
- Developed Python scripts to automate data extraction and transformation for scheduled operational reports, processing approximately 50GB of data weekly.
- Designed and implemented **REST APIs** in **Java Spring Boot** for new service integrations, ensuring robust error handling and clear documentation.
- Supported cross-system integrations by writing SQL queries for data validation and schema changes across **PostgreSQL** and **Oracle** databases for enterprise business systems.
- Collaborated with business analysts and operations teams to gather requirements for enhancements to an enterprise dashboard, contributing to UAT support and post-implementation triage.
- Configured and maintained **Jenkins** pipelines for automated builds and deployments, managing code reviews and Git branching strategies for a team of 4 engineers.

## SKILLS

---

**Support & Operations** – Technical Support, Incident Management, Service Desk, Troubleshooting, Problem Solving, SLA Management, Production Support, Customer Service, Case Management

**Integration & Messaging** – EDI, Messaging Platforms, Data Integration, B2B Integration Essentials (formerly Freeway), REST APIs

**Programming & Scripting** – Python, Java, Spring Boot, SQL, Shell Scripting

**Databases** – PostgreSQL, MySQL, Oracle

**Cloud & DevOps** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

**Tools & Methodologies** – Jira, Confluence, Splunk, Dynatrace, Agile/Scrum

**Data Analytics & BI** – Power BI, Tableau, DAX, Power Query, Data Modelling

## PROJECTS

---

### Enterprise Dashboard Enhancement for Financial Operations

- Enhanced an enterprise dashboard used for financial operations by developing new data ingestion pipelines using **Python** and **SQL**, processing transaction data from multiple sources.
- Implemented automated alerting mechanisms for failed transactions, reducing manual monitoring overhead for the operations team by an estimated **30%**.
- Collaborated with cross-functional teams including business analysts to define requirements and support User Acceptance Testing (UAT) for new dashboard features.

### Automated System Health Monitoring and Reporting

- Developed a suite of **Python** scripts to monitor the health of critical enterprise systems, aggregating logs from **Splunk** and **CloudWatch**.
- Created automated reports summarizing system performance metrics and incident trends, delivering them weekly to a team of 5 operations engineers.
- Integrated system status checks into a **Jenkins** CI/CD pipeline to provide early warnings of potential deployment issues.

## EDUCATION

---

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
