PROJECTS

Automated Financial Transaction Monitoring Dashboard

- Developed a **Python**-based data pipeline to ingest and process transaction data from multiple sources, enabling near real-time monitoring.
- Built interactive **Power BI** dashboards to visualize transaction flows, identify bottlenecks, and alert on failed or stalled payments for an enterprise financial client.
- Implemented data validation checks and reconciliation workflows within the pipeline, ensuring data integrity for operational oversight and audit trails.

Customer Data Analytics Platform Enhancement

- Refactored existing **SQL** queries and introduced strategic indexing on large datasets within **PostgreSQL**, improving report generation speed by **35%**.
- Designed and deployed a **Flask**-based API to serve aggregated customer data for downstream analytical services, handling approximately **50 requests/second**.
- Collaborated with business analysts to define key metrics and build visualizations in **Tableau**, enhancing their ability to track customer engagement trends.
