PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **Python** data pipelines on **AWS Lambda** and **S3** to process ~3,500 events/sec, replacing a less efficient batch job for an internal anti-abuse workflow.
- Designed and implemented **Java Spring Boot** REST APIs for inter-service data exchange, incorporating request validation and circuit-breaker patterns to enhance system resilience.
- Trained a **scikit-learn** gradient-boosted classifier on a ~280k-row labelled dataset to flag suspicious activity, achieving an **AUC of 0.86** on held-out data.
- Acted as the primary technical contact for three enterprise customers during onboarding, gathering feature-pipeline requirements with their data science teams and translating them into **Python** implementations.
- Built **FastAPI** inference endpoints for machine learning models, managing input validation and achieving a p95 latency of approximately **180ms** for real-time scoring.
- Wrote production runbooks and internal documentation that reduced the average customer onboarding time from 4+ weeks to approximately **10 days**.

SKILLS

ML / Data Science – Machine Learning, Data Analytics, Statistical Analysis, Model Training, Model Evaluation, Feature Engineering, scikit-learn, pandas, NumPy, R, RStudio, ML Ops

Programming – Python, Java, SQL, Spring Boot, Flask, FastAPI

Cloud / DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD

Data Tools – Power BI, Tableau, DAX, Power Query, PostgreSQL, MySQL, Oracle

Systems – Linux, REST APIs, ERP Systems, Enterprise Applications

PROJECTS

Customer Onboarding Playbook for ML Feature Store

- Developed a guided onboarding flow for a pilot enterprise customer, including SDK examples and debug tooling, compressing their time-to-first-feature from ~6 weeks to 9 days.
- Built a **Python** CLI tool to validate customer feature definitions against the platform schema, catching ~70% of schema errors before submission.
- Documented common integration patterns and conducted two workshops to upskill the customer data science team on the ML platform.

Fraud Detection Model on Transaction Features

- Engineered a feature pipeline using **Python** and **SQL** to extract behavioural signals from ~1.1M transaction records.
- Trained a **LightGBM** classifier on extracted features, tuning class weights for a 1:140 fraud imbalance, achieving **0.91 AUC** and **0.46 F1** on a held-out month.
- Packaged the trained model behind a **FastAPI** inference endpoint with input validation and feature-drift logging capabilities.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
