PROJECTS

Enterprise Data Pipeline Orchestration (HCL Technologies)

- Built a Python-based data ingestion and transformation pipeline for an enterprise ERP system, processing approximately 1.5 million records daily.
- Integrated with multiple PostgreSQL and Oracle databases to extract, validate, and load data, ensuring data integrity and consistency for reporting.
- Developed automated reconciliation workflows that reduced manual data validation effort by **40%**, freeing up analyst time for deeper insights.

Financial Operations Dashboard Enhancement (HCL Technologies)

- Enhanced a payments operations dashboard by developing new **Java Spring Boot** microservices to process and display real-time transaction monitoring data.
- Implemented data visualization components in **Power BI** to provide clear operational alerts for failed payment messages, improving incident response times by **22%**.
- Collaborated with business analysts to gather requirements for new operational metrics, ensuring the dashboard met evolving client needs for transaction-flow monitoring.
