PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for cross-service data exchange, implementing request validation and circuit-breaker patterns to ensure service resilience.
- Automated data extraction and transformation tasks for operational reporting using **Python** scripts, reducing manual effort by approximately 15 hours per week for the analytics team.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes within strict SLA targets, resolving an average of 4 P1/P2 incidents per month.
- Designed and deployed **Power BI dashboards** to visualize key performance indicators for business stakeholders, enabling faster data-driven decision-making.
- Refactored and optimized **SQL queries** across PostgreSQL and Oracle databases, improving data retrieval times for critical financial reconciliation workflows by an average of 20%.
- Contributed to CI/CD pipeline improvements using **Jenkins** and **Git**, reducing code deployment cycle time by 18% for feature releases.

SKILLS

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

BI & Data Visualization – Power BI, Tableau, DAX, Power Query

Tools & Methodologies – Jira, Confluence, Agile/Scrum, Linux, Splunk, Dynatrace

PROJECTS

Financial Operations Dashboard Enhancement

- Engineered automated data ingestion pipelines using **Python** and **SQL** to process and aggregate transaction data for an enterprise financial-services dashboard.
- Developed interactive **Power BI dashboards** to monitor payment processing workflows and operational alerts, providing real-time visibility into transaction status for over 50 operational users.
- Collaborated with business analysts to gather requirements for new reporting features, implementing changes that improved the accuracy of reconciliation reports by 98%.

Customer Transaction Anomaly Detection Model

- Built a feature pipeline using **Python** and **Pandas** to extract behavioral signals from a dataset of ~350,000 transaction records.
- Trained a **scikit-learn** logistic regression model to identify anomalous transactions, achieving an AUC of approximately 0.78 on a held-out test set.
- Developed a **FastAPI**-based service to expose model predictions, integrating with existing transaction monitoring systems and handling an average of 200 requests per minute.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
