PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Python SDKs** for integrating with core backend services, including webhooks and authentication, supporting thousands of developers.
- Contributed to the design and implementation of **API practices**, performing code reviews and ensuring consistency across new feature releases.
- Managed production incidents for critical backend services, including **webhooks and notification infrastructure**, on AWS, ensuring high availability and reliability.
- Collaborated with product managers and technical writers to define and refine **developer experience features**, translating requirements into actionable engineering tasks.
- Engineered **Java Spring Boot REST APIs** for cross-service communication within the enterprise systems support domain, facilitating data flow between interconnected platforms.
- Automated data validation and reporting tasks using **Python scripting**, processing data from **PostgreSQL and Oracle** databases for operational insights.

SKILLS

Backend Engineering – Go, Python, Java, Spring Boot, PHP, Laravel, REST APIs, Microservices

Cloud & Infrastructure – AWS (ECS, SQS, EventBridge, EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Developer Tools & Practices – APIs, SDKs, Git, Jenkins, CI/CD, Code Reviews, Jira, Confluence, Agile, Scrum

Databases – PostgreSQL, MySQL, Oracle

Observability & Reliability – Splunk, Dynatrace, Incident Response, Production Support

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling

Scripting & Automation – Python, Bash

PROJECTS

Developer Onboarding Toolkit (HCL Technologies)

- Developed a **Python-based CLI tool** that guides new developers through integrating with internal enterprise systems, reducing onboarding time by an estimated 30%.
- Created interactive documentation and code examples for the toolkit, demonstrating usage of **Java Spring Boot APIs** and **PostgreSQL** data access patterns.
- Collaborated with a team of business analysts to gather requirements for the toolkit, ensuring it addressed common integration challenges faced by client-facing teams.

Real-Time Transaction Alerting System (HCL Technologies)

- Built a **Java Spring Boot service** that monitors high-volume transaction flows for anomalies, integrating with **Splunk** for log analysis and **AWS SQS** for event queuing.
- Implemented a **dynamic alerting mechanism** that flags unusual patterns in near real-time, reducing the mean time to detect critical operational issues by approximately 45 minutes.
- Designed the system to be highly available on **AWS EC2 instances**, handling approximately 2,800 events per minute during peak processing periods.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
