PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Facilitated stakeholder workshops with business, risk, and compliance teams to elicit and validate requirements for digital identity solutions, ensuring alignment across all functions.
- Developed detailed process maps and user stories for new identity verification (ID&V) capabilities, translating business needs into actionable functional specifications for the technology team.
- Supported the analysis of current customer onboarding processes, identifying opportunities for automation and enhancement that improved user experience by an estimated 15%.
- Collaborated with Risk Analysts to assess and document potential risks associated with digital identity workflows, contributing to mitigation strategies.
- Managed documentation updates throughout the project lifecycle for digital identity management initiatives, ensuring clarity and adherence to regulatory standards like GDPR.
- Engaged in user acceptance testing (UAT) for new identity solutions, capturing and incorporating feedback to refine functionalities before production rollout.

SKILLS

Business Analysis – Requirements Elicitation, Process Mapping, User Stories, Functional Specifications, UAT, Stakeholder Management, Documentation, Workshop Facilitation

Domain Expertise – Digital Identity Management, Identity Verification (ID&V), EU Digital ID Frameworks, Regulatory Compliance, GDPR, EBA Guidelines

Technical Skills – Python, Java, SQL, Spring Boot, REST APIs, AWS, Docker, Linux

Data & Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling, R, pandas, NumPy, scikit-learn

Operations & Support – Production Support, Incident Response, SLA Management, Change Management, CI/CD, Jenkins, Git, Splunk, Dynatrace

Enterprise Systems – ERP Integration Support, Payments Operations Dashboards, Transaction Monitoring, Reconciliation Workflows

PROJECTS

Digital Identity Workflow Optimization (HCL Technologies)

- Analyzed and mapped existing customer identity verification processes for a financial services client, identifying bottlenecks that contributed to an average 20% longer onboarding time.
- Designed a streamlined digital identity workflow incorporating enhanced data validation checks and automated compliance reporting, reducing manual intervention points by approximately 35%.
- Documented the new workflow and supported UAT with business operations teams, ensuring all regulatory requirements and user experience improvements were met.

Customer Onboarding Analytics Dashboard (MSc Project)

- Developed an interactive Power BI dashboard to visualize key performance indicators (KPIs) for customer onboarding, including time-to-complete and drop-off rates.
- Integrated data from multiple sources using Power Query and applied DAX measures to calculate metrics, providing stakeholders with actionable insights into user journey friction points.
- Presented the completed dashboard and analysis to academic and industry reviewers, demonstrating the impact of data visualization on understanding complex processes.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
