PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Administered and troubleshooted a **Windows** and **Linux** server environment for enterprise applications, resolving approximately **15-20 P1/P2 incidents** per week with a focus on SLA adherence and root cause analysis.
- Automated routine system administration tasks and data extraction processes using **Python scripting**, reducing manual effort by an estimated **40%** across the operations team's reporting functions.
- Developed and maintained **Java Spring Boot** REST APIs for inter-service communication within a distributed enterprise system, ensuring robust error handling and data integrity for over **50 distinct endpoints**.
- Performed deep-dive analysis of system and network logs via **Splunk** and **Dynatrace** to diagnose performance bottlenecks and identify root causes for critical incidents, improving system stability by **18%**.
- Managed cross-system integrations and data flows between **PostgreSQL** and **Oracle** databases, implementing schema changes and performing data validation for enterprise business systems.
- Supported multiple IT projects including software rollouts and infrastructure upgrades, actively participating in **change management** processes and coordinating UAT with business analysts and operations teams.

SKILLS

Operating Systems – Windows, macOS, Linux, Active Directory, Group Policies

Networking – DNS, DHCP, TCP/IP, Subnetting, VLANs, Firewalls, VPNs

Cloud & Virtualization – AWS, Azure, Google Cloud, VMware, Hyper-V, VirtualBox

Scripting & Automation – PowerShell, Bash, Python, Jenkins

Troubleshooting & Support – ITIL V4, Incident Management, Root Cause Analysis, Log Analysis, System Performance Tuning, Remote Support Tools, Vendor Management

Databases – SQL, PostgreSQL, MySQL, Oracle, Database Backups

Security – Cybersecurity Best Practices, MFA, Endpoint Security, Backup and Disaster Recovery

PROJECTS

Enterprise Application Support & Automation Platform

- Engineered a centralized **Python**-based automation framework to streamline log analysis and system health checks across **50+ enterprise servers**, cutting down diagnostic time by an average of **30%**.
- Implemented automated alerting for critical system events by integrating **Python scripts** with **Splunk**, reducing manual monitoring overhead and enabling faster P1 incident response.
- Developed comprehensive documentation and runbooks for common troubleshooting procedures, adopted by the L1 support team to improve first-call resolution rates by **12%**.

Cross-System Data Integration & Reporting Tool

- Designed and deployed **Java Spring Boot** microservices to facilitate data synchronization between disparate enterprise systems, handling approximately **1,500 transactions** per hour.
- Developed **SQL queries** and automated ETL processes using **Python** for data validation and reporting from **PostgreSQL** and **MySQL** databases, supporting business analysts with timely data extracts.
- Collaborated with business analysts to gather requirements for new data integration features, ensuring alignment with operational needs and contributing to a **15%** improvement in data accuracy for key reports.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
