## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Engaged with **specifiers** and **contractors** to gather technical requirements for large commercial EV charging installations, translating needs into tailored system proposals.
- Developed and delivered **technical demonstrations** of EV charging systems to potential clients, highlighting key features and integration capabilities to secure sales opportunities.
- Managed the full sales cycle for EV charging infrastructure projects, from initial lead generation through to closing deals and coordinating implementation with engineering teams.
- Designed and presented **best-in-class technical solutions** for complex commercial EV charging scenarios, ensuring alignment with client operational needs and green energy objectives.
- Collaborated with cross-functional teams to support the integration of **new EV charging hardware** and software components into existing client infrastructure.
- Contributed to post-sales technical support, addressing client queries and ensuring successful deployment and operation of installed EV charging systems.

## SKILLS

**Sales & Business Development** – Sales Engineer, Technical Sales, Client Engagement, Requirements Gathering, Pre-Sales, Post-Sales Support

**EV Charging & Green Energy** – EV Charging Systems, Transport Infrastructure, Electrification, Green Energy, Renewable Energy

**Technical Skills** – Technical Solutions Design, System Integration, Hardware & Software Integration, API Concepts

**Project Management & Operations** – Sales Cycle Management, Project Coordination, Installation Support, Technical Demonstrations

**Communication & Collaboration** – Stakeholder Management, Contractor Relations, Specifier Engagement, Customer Experience

## PROJECTS

### EV Charging Solutions for Commercial Fleet Management

- Designed and proposed a scalable EV charging solution for a 50-vehicle commercial fleet, focusing on **high-availability charging** and load management to meet operational demands.
- Created detailed technical documentation and **presentation decks** outlining system architecture, power requirements, and integration points for client stakeholders.
- Collaborated with external vendors to ensure the selected charging hardware and network management software met all specified performance and safety standards.

### Technical Feasibility Study for Public EV Charging Hub

- Assessed technical feasibility for a large-scale public EV charging hub, evaluating various **charging hardware** options and grid connection requirements.
- Developed a comparative analysis of different charging network protocols and management systems, providing recommendations for optimal deployment.
- Presented findings and technical specifications to a business development team, supporting the bid process for a major infrastructure project.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
