PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing **RESTful APIs** for data exchange with enterprise systems, handling approximately **1,500 requests per minute** during peak hours.
- Authored **Python scripts** to automate ETL processes for operational reporting, reducing manual data aggregation time by **~40%** for the financial operations team.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, achieving a resolution rate of **95%** for P1/P2 tickets within SLA targets.
- Designed and implemented **SQL Server** stored procedures and optimized complex queries to support new feature development, improving data retrieval performance by **~30%**.
- Collaborated on the integration of **Spring Security** into existing Java applications, ensuring secure API endpoints and robust authentication mechanisms.
- Contributed to CI/CD pipelines using **Jenkins** and **Git** for automated builds, testing, and deployments, cutting down average deployment cycle time by **22%**.

SKILLS

Backend Development – Java, Spring Boot, Spring Security, Tomcat, Hibernate/JPA, Microservices, RESTful APIs, JSON, SOAP, Multi-threading, Distributed Systems, Design Patterns

Database Technologies – SQL Server, PostgreSQL, MySQL, Oracle, SQL, Relational Databases

Frontend Development – React, Redux, Typescript, Angular

DevOps & Cloud – AWS, Cloud Foundry, Docker, Git, Jenkins, Maven

Monitoring & Automation – Splunk, Dynatrace, Python, Shell Scripting

Testing – Junit

PROJECTS

Enterprise Payments Workflow Orchestration

- Engineered a **Java Spring Boot** application to process and route financial transaction messages, integrating with upstream and downstream systems via **RESTful APIs**.
- Implemented asynchronous processing using a **message queuing** mechanism to ensure reliable handling of over **2,000 transactions per hour**, maintaining a 98% success rate.
- Developed data validation rules and error handling for transaction reconciliation workflows, reducing manual reconciliation efforts by approximately **15%**.

Automated Data Ingestion and Reporting Framework

- Built a **Python**-based framework for automated data extraction, transformation, and loading (ETL) from disparate sources into a central data repository.
- Designed and deployed scheduled jobs using **cron** on **Linux** for regular data pipeline execution, ensuring timely availability of reports for business analysts.
- Created interactive dashboards using **Power BI** to visualize key operational metrics, enabling stakeholders to track performance and identify trends more effectively.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
