PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided technical leadership on complex projects, translating client requirements for strategic power system analysis into actionable deliverables for a global energy client.
- Developed and executed in-depth power systems analysis, including **short circuit**, **power flow**, and **protection coordination studies** for enterprise clients in the data center and pharmaceutical sectors.
- Prepared detailed technical and non-technical reports for client presentations, ensuring project outputs met client satisfaction and budgetary requirements for electrical engineering consulting engagements.
- Managed remote client meetings, effectively communicating project status and managing expectations through timely responsiveness and structured updates on project performance.
- Gained familiarity with a company's quality system, contributing to its enhancement through participation in internal workshops focused on process improvement and growth strategies.
- Supported wind project and installation teams by performing **grid connection analysis**, including **static & dynamic transient stability** assessments and harmonic evaluations.

SKILLS

Power Systems Analysis – Short Circuit, Power Flow, Protection Coordination, Arc Flash, Electrical Safety, Grid Connection, Embedded Generation, Transient Stability, Harmonics, Flicker, Transformer Inrush, Power Quality, Earthing, Sag Ride-through, Reliability Assessments

Power System Study Software – SKM, ETAP, EasyPower

Protection Design – Unit Protection Settings, Bus Differential (87B), Transformer Differential (87T), Restricted Earth Fault, Directional Protection (67)

Engineering Standards – IEC 60502-2, IEC 60364-5-52

General Engineering – Technical Leadership, Solution Development, Client Requirements Translation, Report Preparation, Project Management, Quality System Enhancement, Sales Strategy Involvement

Programming & Scripting – Python, Java, SQL, REST APIs

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

PROJECTS

Enterprise Power System Reliability Assessment

- Conducted a comprehensive **power system reliability assessment** for a large-scale semiconductor manufacturing facility, evaluating redundancy and failure modes across critical distribution networks.
- Performed detailed **short circuit** and **protection coordination studies** using **ETAP** to identify potential system weaknesses and recommend mitigation strategies, ensuring adherence to IEC standards.
- Authored a final technical report detailing findings, analysis methodologies, and actionable recommendations for enhancing overall system resilience and operational uptime, delivered to the client's engineering leadership.

Arc Flash and Electrical Safety Analysis for Pharmaceutical Client

- Executed detailed **arc flash** and **electrical risk assessments** for a pharmaceutical client's R&D facility, analyzing equipment and potential hazards.
- Designed unit protection settings, including **Bus Differential (87B)** and **Transformer Differential (87T)**, to ensure safety and operational integrity within the facility's power distribution system.
- Developed clear, non-technical summaries of complex safety findings for stakeholder communication, facilitating informed decision-making on risk mitigation measures.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
