PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Analyzed customer account data, including **consumption validation** and **tariff checks**, to identify underlying causes of charging discrepancies for over 500 accounts.
- Developed **Python scripts** to automate the generation of weekly performance reports for **revenue protection activities**, reducing manual effort by approximately 8 hours per week.
- Resolved complex customer issues by **engaging with network operators** and internal teams, ensuring timely resolution within defined SLAs.
- Managed non-performing accounts, coordinating with customers to set up and monitor **repayment plans**, successfully reducing aged debt by an average of **15%** for assigned accounts.
- Investigated root causes of identified exceptions and discrepancies in customer charging through detailed **account analysis** and **technician site report audits**.
- Facilitated customer repayment negotiations and monitored plan performance, contributing to the successful collection of outstanding balances for a portfolio of **~200 accounts**.

SKILLS

Data Analysis & Reporting – Excel, SQL, Power BI, Tableau, R, Python (pandas, NumPy)

Customer & Account Management – CRM Systems, Repayment Plan Setup, Debt Management, Customer Communication, SLA Management, Escalation Handling

Revenue Protection & Fraud Analysis – Charging Discrepancy Investigation, Consumption Validation, Tariff Checks, Meter Comparison, Root Cause Analysis, Audit

Technical Skills – Python, Java, Spring Boot, SQL (PostgreSQL, MySQL, Oracle), AWS (EC2, S3, Lambda), Docker, Linux, Git, Jenkins

Business & Operations – Process Refinement, Agile/Scrum, Change Management, Business Systems Integration, Regulatory Compliance

PROJECTS

Customer Account Reconciliation System (HCL Technologies)

- Developed a **Python application** to compare charging data between internal systems and external meter records, flagging discrepancies for investigation.
- Engineered **SQL queries** across PostgreSQL and Oracle databases to extract and validate transaction data, supporting the reconciliation process for over **1,000 daily transactions**.
- Created **Power BI dashboards** to visualize reconciliation status, highlight exceptions, and track resolution progress for operational teams.

Automated Reporting for Financial Operations (HCL Technologies)

- Built **Python scripts** to automate the extraction and aggregation of operational data from multiple sources, including log files and databases.
- Designed and implemented **ETL processes** using SQL and Python to transform raw data into a format suitable for reporting, reducing data preparation time by **40%**.
- Generated scheduled reports on system performance and incident metrics, providing key insights to business analysts and support teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
