PROJECTS

Guidewire Integration Framework Implementation (HCL Technologies)

- Developed core integration components using **Gosu** and the **Guidewire Integration Framework** to connect disparate enterprise systems for a financial services client.
- Designed data mapping and transformation logic to ensure seamless data flow between the core insurance platform and downstream operational dashboards, reducing data latency by **~20%**.
- Participated in UAT cycles, triaging and resolving integration-related defects, contributing to a successful go-live for a critical system upgrade.

Automated Financial Reporting Pipeline (HCL Technologies)

- Created a **Python**-based ETL pipeline to consolidate and process transaction data from multiple PostgreSQL and Oracle databases for daily operational reporting.
- Implemented automated data validation checks within the pipeline, catching approximately **85%** of data integrity issues before report generation.
- Scheduled and monitored pipeline execution using **cron jobs** and **Linux** shell scripts, ensuring reliable delivery of financial reports to business analysts.
