PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Diagnosed and resolved critical bugs and CVEs for long-term Red Hat OpenShift AI maintenance streams, ensuring product stability for enterprise customers.
- Developed and executed backporting strategies for security patches and bug fixes to stable release streams, maintaining product integrity.
- Contributed to the patch review process, collaborating with developer and QE teams globally to meet schedule requirements and quality standards for Red Hat's patch delivery.
- Implemented automated test suites for backend services and web applications, integrating them into a **CI/CD workflow** using **Jenkins** and **GitLab CI**.
- Analyzed and debugged root causes of failures in complex distributed systems, facilitating efficient resolution and preventing recurrence.
- Created automation tools to improve the efficiency and flexibility of patch delivery, reducing manual intervention by approximately **30%**.

SKILLS

Languages – Python, Go, Java, SQL

Cloud Native – Kubernetes, OpenShift, Docker, AWS, GCE, Azure

CI/CD & Automation – Jenkins, GitHub Actions, GitLab CI, PyTest, Cypress, Bash Scripting

Development – Spring Boot, REST APIs, Microservices, Backend Development

Observability & Tools – Splunk, Dynatrace, Jira, Confluence, Linux

Data & Analytics – Power BI, Tableau, R, pandas, NumPy, scikit-learn

AI/ML Concepts – MLOps, Machine Learning Fundamentals

PROJECTS

OpenShift AI Patching Automation (HCL Technologies)

- Developed Python scripts to automate the identification and application of security patches (CVEs) to OpenShift components, reducing manual patching time by **40%**.
- Integrated automated testing frameworks (PyTest) into a **Jenkins** pipeline for validating backported fixes, catching regressions **2 days** earlier in the release cycle.
- Collaborated with internal QE teams to define test plans and execute them against patched builds, ensuring release readiness for a subset of product modules.

Containerized Application Support Framework (HCL Technologies)

- Built a Python-based framework for monitoring and managing Docker containers running enterprise applications, focusing on **log aggregation** and **health checks**.
- Designed and implemented RESTful APIs using **Flask** for external systems to query container status and trigger basic restart operations, improving incident response time by an average of **15 minutes**.
- Configured automated alerts using **Splunk** for critical container events, notifying operations teams of potential issues before they impacted end-users.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
