PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented scalable CI/CD pipelines using **GitHub Actions**, automating build, test, and deployment processes for multiple microservices, reducing manual intervention by **40%**.
- Managed and provisioned cloud infrastructure on **AWS** using **Terraform**, ensuring declarative state management for environments including **EKS**, **EC2**, and **S3**.
- Developed automation scripts in **Python** and **Bash** to streamline operational tasks, including log analysis and system health checks, improving incident response times by **15%**.
- Deployed and managed containerized applications at scale using **Kubernetes**, overseeing cluster health and application lifecycle management within production environments.
- Monitored system performance and availability across distributed applications using **Splunk** and **CloudWatch**, proactively identifying and resolving issues to maintain service level objectives.
- Collaborated with development and QA teams to integrate security best practices into the infrastructure and deployment workflows, ensuring secure and reliable solutions.

SKILLS

Cloud Infrastructure – AWS, EKS, EC2, S3, IAM, RDS, Lambda, CloudWatch

Container Orchestration – Kubernetes

Infrastructure as Code – Terraform

CI/CD & Automation – GitHub Actions, GitLab CI/CD, Python, Bash, Jenkins, Git

Monitoring & Observability – Splunk, Dynatrace

Databases – PostgreSQL, MySQL, Oracle, RDS

Programming Languages – Java, Spring Boot, Python, Bash, SQL

PROJECTS

Scalable Kubernetes Platform Deployment

- Engineered a **Kubernetes** cluster on **AWS EKS** to host microservices, managing ingress traffic with **Terraform** and ensuring high availability.
- Automated the deployment of applications to the Kubernetes cluster using **GitHub Actions**, enabling developers to push code and have it automatically deployed.
- Implemented comprehensive monitoring and logging for the cluster using **Prometheus** and **Grafana**, providing visibility into resource utilization and application performance.

AWS Infrastructure Automation with Terraform

- Developed a modular **Terraform** codebase to provision and manage core AWS resources including **VPCs**, **EC2 instances**, **S3 buckets**, and **IAM roles**.
- Integrated **Python scripting** to automate post-provisioning configuration tasks, such as setting up initial user accounts and installing essential packages on new servers.
- Established an automated pipeline for infrastructure changes, ensuring consistency and reducing manual errors in environment setup and updates across development and staging.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
