## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Facilitated cross-functional workshops with business stakeholders to gather requirements and define user stories for system enhancements, aligning with **Agile ceremonies**.
- Produced detailed analysis artifacts including **process maps** and **wireframes** to translate business needs into actionable development tasks for delivery teams.
- Analyzed **quantitative and qualitative data** from operational dashboards to identify trends and validate business cases, informing strategic recommendations.
- Collaborated with developers and testers to ensure solution feasibility and clarity throughout the **software development lifecycle**, supporting UAT planning and defect triage.
- Developed **training materials and user guidance** to support successful change adoption for new system implementations and process improvements.
- Supported the maintenance and enhancement of enterprise systems, integrating with **ERP modules** and operational platforms via **REST APIs** and database flows.

## SKILLS

**Business Analysis** – Requirements Engineering, Process Modelling, User Stories, Acceptance Criteria, Non-Functional Requirements, Business Case Development, Stakeholder Management, Workshop Facilitation, Agile Methodologies, PRINCE2, Kanban, Scrum, UAT Planning, Change Adoption Support

**Data Analysis & BI** – Data Analysis, Quantitative Analysis, Qualitative Analysis, Data Validation, Trend Analysis, Power BI, Tableau, DAX, Power Query, Data Modelling, Business Intelligence

**Software Engineering** – Java, Spring Boot, Python, REST APIs, SQL, PostgreSQL, MySQL, Oracle, Linux, Git, Docker, CI/CD, Jenkins

**Operations & Support** – Production Support, Incident Response, SLA Management, Monitoring Tools (Splunk, Dynatrace, CloudWatch), Change Management, Jira, Confluence

**Cloud & Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch)

## PROJECTS

### Enterprise Systems Integration and Reporting Platform

- Developed a **Java Spring Boot REST API** to facilitate data exchange between an ERP system and a customer-facing operations dashboard, enabling real-time data synchronization.
- Designed and implemented **SQL scripts** for data validation and transformation, ensuring data integrity across disparate systems and supporting reconciliation workflows.
- Created interactive **Power BI dashboards** to visualize key operational metrics and transaction flows, providing stakeholders with actionable insights for performance monitoring.

### Automated Financial Operations Dashboard Enhancement

- Engineered **Python scripts** to automate the ingestion and processing of transaction data from various sources, reducing manual effort by an estimated **40%**.
- Contributed to the enhancement of an existing **payments operations dashboard** by developing new monitoring alerts and refining data aggregation logic for failed transactions.
- Documented system changes and facilitated UAT sessions with business analysts and operations teams to ensure alignment with requirements prior to go-live.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
