PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Contributed to backend development by designing and implementing **REST APIs** in **Java Spring Boot** for seamless data exchange between enterprise systems, supporting cross-system integrations for a financial services client.
- Automated repetitive operational tasks and enhanced data processing capabilities through the development of **Python scripts**, reducing manual effort by approximately **15%** for scheduled reporting workflows.
- Collaborated with senior engineers to design and build application features, participating in **code reviews** and contributing to the implementation of product architecture improvements on the core platform.
- Wrote and maintained clean, well-tested code for backend services, focusing on improving application **performance and reliability** through bug troubleshooting and iterative enhancements over a 3.5-year tenure.
- Developed and maintained **SQL queries** and performed data validation across **PostgreSQL** and **MySQL** databases to support enterprise business systems and integration efforts.
- Managed production support for enterprise applications, responding to P1/P2 incidents and ensuring SLA adherence within a **Linux** environment using tools like **Splunk** and **Dynatrace**.

SKILLS

Backend Development – Python, Java, Spring Boot, REST APIs, Flask, FastAPI

Databases – SQL, PostgreSQL, MySQL, Oracle

Frontend Development – React, Angular

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD

Observability & Support – Splunk, Dynatrace, Linux, Shell Scripting

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, RStudio, pandas, NumPy, scikit-learn

PROJECTS

Internal Workflow Automation Tool

- Developed a **Python**-based command-line tool to automate the generation of monthly operational reports, reducing report generation time from 4 hours to 30 minutes.
- Integrated the tool with **PostgreSQL** to extract and aggregate data, ensuring data accuracy and consistency for financial reconciliation workflows.
- Designed a user-friendly interface for the tool, enabling operations teams to easily configure report parameters and schedule executions via **cron jobs**.

Customer Data Integration Service

- Built a **REST API** service using **Java Spring Boot** to enable secure data exchange between an internal feature store and client-facing applications.
- Implemented asynchronous processing patterns using **AWS Lambda** to handle fluctuating data ingestion loads, processing approximately **3,500 events** per second during peak hours.
- Developed comprehensive unit and integration tests, achieving over **90% code coverage** for critical API endpoints and ensuring reliable data transfer for enterprise customers.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
