PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Python**-based backend services for a content management platform, integrating with **PostgreSQL** databases.
- Designed and implemented **REST APIs** in **Java Spring Boot** to facilitate data exchange between microservices, improving inter-service communication efficiency by approximately **18%**.
- Contributed to the development of **Django** web application features, focusing on building clean, maintainable, and well-tested code as part of an Agile team.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, resolving P1/P2 issues within defined SLAs and ensuring system reliability.
- Automated data ingestion and transformation tasks using **Python** scripting, reducing manual processing time for scheduled reports by an average of **4 hours** per week.
- Collaborated with cross-functional teams to define requirements, support user acceptance testing, and triage post-implementation issues for enterprise systems.

SKILLS

Backend Development – Python, Django, Java, Spring Boot, REST APIs, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle, SQL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD

Frontend Development – React, Angular

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

Methodologies & Tools – Agile, Scrum, Jira, Confluence, Linux

PROJECTS

Enterprise Content Management System Enhancement

- Developed new backend features in **Python** and **Django** for a legal content management system, including API endpoints for document retrieval and version control.
- Integrated a **REST API** client to fetch and process external regulatory data feeds, ensuring timely updates for over **5,000** managed documents.
- Wrote comprehensive unit and integration tests for new features, increasing code coverage by **22%** and reducing post-deployment bugs.

Automated Data Processing Pipeline

- Engineered a **Python**-based ETL pipeline to extract, transform, and load operational data from multiple sources into a central **PostgreSQL** data warehouse.
- Implemented data validation checks and error handling within the pipeline, successfully identifying and flagging approximately **300** data anomalies per month.
- Scheduled and monitored pipeline execution using **cron jobs** and basic shell scripting, ensuring reliable daily data refreshes for reporting teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
