PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Assisted the Maintenance Control team in ensuring smooth daily operations, managing over 3,600 flights and 20+ million passengers per month.
- Liaised directly with flight crew and on-site engineers to diagnose and resolve technical defects on aircraft, facilitating timely return to service.
- Managed the dispatch process for the Lear Jet, coordinating the transport of engineers and critical spares to support AOG (Aircraft on Ground) recovery efforts.
- Reviewed open HILs (Hardware/In-Line) and other maintenance forecasts to ensure scheduled tasks were planned and executed according to operational requirements.
- Provided real-time updates and distribution of technical issue summaries, maintaining high visibility of fleet AOG status across the engineering department.
- Supported incident response and triage for critical operational disruptions, contributing to a calm and controlled reaction to changing flight situations.

SKILLS

Aviation Operations – Maintenance Control, Aircraft on Ground (AOG) Recovery, Technical Defect Resolution, Flight Crew Liaison, Spares Dispatch

Engineering Support – Return to Service, Maintenance Planning, Operational Forecasting, Technical Issue Reporting, Fleet Status Visibility

Process Management – Incident Triage, Change Management, Cross-functional Collaboration, Stakeholder Communication, Requirements Gathering

Core Technologies – Linux, Shell Scripting, SQL, Java, Python, AWS

Agile Methodologies – Scrum, Jira, Confluence, Code Reviews

PROJECTS

AOG Recovery Coordination System (HCL Technologies)

- Developed a Python-based tool to track and manage AOG aircraft situations, integrating real-time status updates from multiple engineering teams.
- Implemented automated notification workflows via email and SMS to alert relevant personnel about aircraft grounding and return-to-service milestones.
- Designed a centralized dashboard displaying fleet AOG status, estimated repair times, and required spare parts, improving team situational awareness by approximately 40%.

Technical Defect Analysis and Reporting (HCL Technologies)

- Engineered Python scripts to parse and analyze technical defect logs from aircraft maintenance records, identifying recurring issues.
- Created SQL queries against a PostgreSQL database to extract and aggregate defect data, facilitating trend analysis for maintenance planning.
- Generated weekly summary reports detailing the top 5 technical defects, contributing to proactive maintenance scheduling and reduction of AOG events.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
