PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **shared backend services** on **AWS** for enterprise SaaS applications, focusing on **scalability** and **maintainability**.
- Architected and developed **distributed systems** using **microservices** and **event-driven patterns**, supporting enterprise-scale workloads on **Kubernetes**.
- Owned critical backend services from conception through deployment, enhancing **performance optimization** and **operational excellence** for platform components.
- Collaborated extensively with product engineers and architects to define **platform capabilities** and establish **technical standards** for backend development.
- Drove technical initiatives to improve **developer productivity** and **system observability** through enhanced logging and monitoring frameworks.
- Analyzed **system performance** and **data patterns** to identify optimization opportunities, contributing to future platform roadmap decisions.

SKILLS

Languages – C#, .NET Core, Python, Java, SQL, English

Cloud & Orchestration – Kubernetes, Azure, AWS, GCP, Docker

Messaging & Observability – Kafka, RabbitMQ, Prometheus, Grafana, Splunk, Dynatrace

Backend & APIs – Microservices, Event-Driven Architecture, REST APIs, Shared Libraries, API Design & Governance

Development Practices – Agile/Scrum, CI/CD, Git, Code Reviews, Pair Programming, Jenkins

Enterprise Systems – SaaS Applications, Multi-tenancy, Identity and Access Management (IAM)

Education & Foundations – Computer Science, Data Analytics, Bachelor of Engineering

PROJECTS

Core Platform Services for Enterprise Security

- Developed a suite of **shared backend services** using **.NET Core** and **C#**, deployed on **Kubernetes** within an **Azure** cloud environment to support multiple product teams.
- Implemented **event-driven patterns** with **Kafka** for asynchronous communication between platform services, improving system resilience and decoupling dependencies across the platform.
- Contributed to API design and governance for these services, ensuring consistency and adherence to technical standards across consuming product teams.

Developer Productivity & Observability Enhancements

- Engineered **Python scripts** and **Java Spring Boot** applications to automate deployment processes and gather operational metrics for platform components.
- Integrated **Prometheus** and **Grafana** for enhanced system observability, enabling real-time monitoring of key performance indicators and faster incident response for a team of 5 engineers.
- Developed internal tooling that reduced manual deployment steps by approximately **30%**, allowing engineers to focus more on feature development.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
