PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Translated business needs into actionable technical requirements for engineering teams, ensuring clear project scope and acceptance criteria for new feature development.
- Collaborated with Data Engineers to refine requirements, define comprehensive test cases, and document evolving architectures and data flows for core services.
- Managed the lifecycle of features from initial concept through development, rollout, and ongoing operational support, maintaining visibility into system health and performance.
- Applied **Git**, **Jenkins**, and **monitoring dashboards** to maintain consistent visibility and control over system health, proactively identifying and addressing potential issues.
- Improved system reliability at scale by implementing systematic approaches to problem-solving and feature development, moving services from 'working' to production-ready.
- Developed and maintained **Python** scripts for data pipelines and ETL processes, supporting data ingestion and transformation for analytical reporting.

SKILLS

Product Management – Technical Requirements, Business Needs Translation, Feature Lifecycle Management, Agile Environment, Ownership, Pragmatic Solutions

Data Engineering – ETL, Data Flows, Data Pipelines, Data Transformation

DevOps & Monitoring – Git, Jenkins, Monitoring Dashboards, System Health, Grafana, Graylog, TDD

Programming Languages – Python, Java

Databases – SQL, PostgreSQL, MySQL, Oracle

Cloud & Infrastructure – AWS, EC2, S3, Lambda, Docker

Methodologies – Agile, Scrum

PROJECTS

Data Service Reliability Initiative

- Enhanced the reliability of core data services by implementing robust error handling and retry mechanisms, reducing incident frequency by **18%** over a quarter.
- Developed automated deployment pipelines using **Jenkins** and **Docker**, streamlining the release process for microservices and cutting deployment time by **30%**.
- Integrated **Grafana** dashboards for real-time monitoring of key performance indicators, enabling faster detection and resolution of operational issues.

Customer Requirements Translation Engine

- Engineered a system to translate high-level business requirements into detailed technical specifications for development teams, using a standardized template that improved clarity for **3 engineering teams**.
- Collaborated with business analysts to gather and refine requirements for a new data reporting module, ensuring alignment with operational needs and stakeholder expectations.
- Documented technical specifications and test plans in **Confluence**, facilitating efficient handoffs and knowledge sharing within the project lifecycle.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
