PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Architected and developed **RESTful API Endpoints** using **Java Spring Boot**, focusing on high performance and maintainability for enterprise applications.
- Collaborated with front-end engineers to develop **dynamic, responsive web applications**, contributing to UI/UX design principles and implementation.
- Defined **Data Models and database schemas** for both **PostgreSQL** and **MySQL** relational databases, ensuring data integrity and optimizing query performance for core business systems.
- Implemented **CI/CD pipelines** using **Jenkins** and **Git** for automated builds, testing, and deployments, reducing manual intervention by approximately **30%**.
- Provided production support for enterprise Java/.NET applications, responding to P1/P2 incidents and managing SLAs using **Splunk** and **Dynatrace**.
- Developed **Python scripts** for data pipeline automation and scheduled reporting, processing approximately **15,000 records** daily for financial operations.

SKILLS

Backend Development – Java, Spring Boot, Python, Go, REST APIs, Microservices

Frontend Development – JavaScript, HTML, CSS, React, Angular, TypeScript, Jest, Babel

Database Management – SQL, PostgreSQL, MySQL, Oracle, NoSQL, Data Modeling

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, Terraform, Ansible

Observability & Support – Splunk, Dynatrace, CloudWatch, Linux Shell Scripting, Incident Response

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

Methodologies – Agile, Scrum, SAsFe, CI/CD

PROJECTS

Enterprise Application Performance Monitoring Tool

- Developed a **Java Spring Boot** backend service to aggregate application performance metrics from multiple sources, including **Splunk** and **Dynatrace**.
- Designed and implemented **RESTful API endpoints** to expose aggregated performance data, enabling real-time monitoring dashboards for a team of 8 operations analysts.
- Containerized the application using **Docker** and deployed it on **AWS EC2** instances, establishing a CI/CD pipeline with **Jenkins** for automated updates.

Automated ETL Pipeline for Financial Reporting

- Engineered a **Python**-based ETL pipeline to extract, transform, and load data from various operational databases (**PostgreSQL**, **MySQL**) into a data warehouse.
- Implemented data validation checks and error handling routines, reducing data inconsistencies in downstream reports by approximately **22%**.
- Scheduled and automated the pipeline execution using **cron jobs** on Linux servers, ensuring timely delivery of daily financial reconciliation reports.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
