PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Python** scripts to automate data ingestion tasks for large-scale data processing workflows, reducing manual effort by ~30%.
- Operated and extended **cloud infrastructure** on **GCP** using **Terraform**, managing resources for a data ingestion pipeline supporting petabyte-scale data collection.
- Collaborated with AI Scientists to refine data quality and throughput, enabling the delivery of richer datasets for training next-generation **machine learning models**.
- Designed and implemented **REST APIs** using **Java Spring Boot** to facilitate cross-service data exchange for enterprise business systems.
- Analyzed and resolved production incidents for enterprise applications, managing SLAs and performing root cause analysis for P1/P2 issues across **Linux** environments.
- Contributed to a **payments operations dashboard** by developing **Python** automation scripts and performing **SQL** data validation for transaction monitoring.

SKILLS

Languages – Python, Bash, Java, SQL, R

Cloud & Infrastructure – GCP, AWS, Docker, Terraform, Linux

Data Processing & Pipelines – ETL, Data Ingestion, Web Crawlers, Large-scale data processing, Data Warehousing

Frameworks & Tools – Spring Boot, Flask, FastAPI, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

ML & Analytics – Machine Learning, Data Analytics, Scikit-learn, Pandas, NumPy, DAX, Power Query

PROJECTS

Data Ingestion Pipeline Automation (HCL Technologies)

- Engineered a scalable data ingestion pipeline using **Python** and **GCP** services to process and store large volumes of raw data, supporting a financial-services client's operational dashboard.
- Automated ETL processes with **Python scripting**, reducing data processing time by ~20% and improving data availability for downstream analytics.
- Managed cloud infrastructure configurations using **Terraform**, ensuring reliable deployment and operation of the data pipeline within a production environment.

Enterprise Systems Integration Framework (HCL Technologies)

- Developed a modular **REST API** framework in **Java Spring Boot** to enable seamless integration between disparate enterprise business systems, including ERP modules.
- Implemented cross-system data flows via **SQL** queries and API calls across **PostgreSQL** and **MySQL** databases, ensuring data consistency.
- Collaborated with business analysts to gather requirements and support UAT for system configuration changes, managing change control processes.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
