PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed **ETL pipelines** in Python to process and transform ~50,000 daily financial transactions, ensuring data integrity for reconciliation operations.
- Optimized **SQL queries** across PostgreSQL and Oracle databases, reducing analytical report execution times by **30%** for the financial services client's operations dashboard.
- Analyzed complex data sets from multiple enterprise systems, identifying and resolving over **50 data quality discrepancies** per quarter to improve accuracy in reconciliation workflows.
- Collaborated with business analysts and operations teams to gather requirements for new reconciliation features, translating them into technical specifications for **Java Spring Boot** services.
- Monitored and troubleshooted production **ETL jobs** and Java/Spring Boot applications using **Splunk** and **Dynatrace**, resolving an average of 15 P1/P2 incidents per month.
- Contributed to automation initiatives by developing **Python scripts** for scheduled reporting and data validation, reducing manual intervention in reconciliation workflows by an estimated **20%**.

SKILLS

ETL Tools – DataStage, AWS Glue, Azure Data Factory, Power Query

Databases – PostgreSQL, MySQL, Oracle, SQL

Programming Languages – Python, Java, Shell Scripting

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Tools & Methodologies – Jenkins, Git, Jira, Confluence, Agile, Docker, Data Modeling, Data Warehousing

PROJECTS

Reconciliation ETL Pipeline Enhancement

- Developed and optimized **Python-based ETL pipelines** to ingest, transform, and load transaction data from disparate sources into a central data warehouse for reconciliation.
- Implemented robust data validation checks and error handling mechanisms within the ETL process, reducing data quality issues reported by downstream reconciliation teams by **25%**.
- Documented the end-to-end ETL data flows, business rules, and operational procedures, creating a knowledge base for team members and facilitating smoother UAT and production support.

Financial Transaction Monitoring Dashboard

- Engineered **Java Spring Boot microservices** to process and enrich real-time transaction data streams, feeding into an operational dashboard for monitoring payment statuses.
- Integrated with **PostgreSQL** and utilized **Splunk** for log aggregation and real-time alerting on failed or suspicious transactions, supporting an average of **~3,200 alerts** per week.
- Collaborated with business analysts to define key operational metrics and design dashboard components, enhancing visibility into reconciliation status and operational bottlenecks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
