PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Gathered and documented detailed business requirements from clients, translating complex needs into actionable specifications for development teams, improving requirement clarity by **30%**.
- Investigated and analyzed existing codebases and system configurations to understand functional logic and identify areas for technical improvement, supporting a **4-person** development team.
- Mapped out intricate business processes and real-world workflows, transforming unstructured information into clear, diagrammatic representations for development and UAT purposes.
- Managed project estimates and commitments, ensuring reliable delivery by proactively communicating any deviations from planned timelines to stakeholders.
- Developed and executed test cases for new features and integrations, meticulously documenting defects and validating fixes to ensure adherence to client specifications.
- Assisted in UAT coordination and post-go-live triage for enterprise systems, resolving critical issues and ensuring smooth system transitions for operational teams.

SKILLS

Consulting & Business Analysis – Requirements Gathering, Process Mapping, Stakeholder Communication, Documentation, Client Calls, Estimation, UAT

AI Tools & Productivity – Claude Code, Cursor, GitHub Copilot, Agentic AI Tools, Research

Technical Analysis – Codebase Investigation, System Configuration Analysis, API Documentation Reading, Endpoint Testing (Postman, Insomnia)

Programming & Scripting – Python, SQL, Java

Data Analysis & BI – Data Digging, Large Datasets, Power BI, Tableau, R, DAX, Power Query

Development Practices – Agile/Scrum Ceremonies, Git, Code Reviews, Jira, Confluence

PROJECTS

Client Onboarding Automation for Ecommerce Platform

- Developed a Python-based onboarding tool that automated the configuration of standard settings and initial data imports for new retail clients, reducing manual setup time by **~40%**.
- Collaborated with client stakeholders to gather requirements for initial system setup and integration points, creating clear documentation used by the implementation team.
- Integrated the onboarding tool with the platform's core APIs, enabling seamless data flow and reducing errors in initial customer environment provisioning.

Internal Tooling for Codebase Analysis and Documentation

- Built a Python script to parse Java Spring Boot codebases, extracting key dependencies, API endpoints, and data models to auto-generate initial system documentation.
- Researched and integrated AI-assisted code analysis tools (similar to Claude Code) to identify potential issues and suggest refactoring opportunities within legacy systems.
- Created a centralized Confluence space to store and manage the generated documentation, improving knowledge sharing for a team of **5** engineers.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
