PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Acted as the primary technical contact for troubleshooting and fault diagnosis on critical industrial equipment, analyzing issues and recommending corrective actions to ensure timely resolutions for a fleet of over **150 pumps**.
- Provided specialist support to **field service engineers**, guiding them through complex diagnostic procedures and ensuring accurate, timely technical responses to customer inquiries.
- Captured, retained, and shared technical knowledge across the service organization by developing **detailed fault diagnosis guides** and contributing to a central knowledge base, reducing repeat incident resolution time by **18%**.
- Managed technical escalations from frontline teams, liaising with **specialist technical experts** and R&D; departments to resolve complex equipment behaviour patterns.
- Contributed to operational reliability and overall service performance by proactively identifying recurring failure modes in **rotating equipment** and proposing preventative maintenance strategies.
- Assisted in protecting service continuity during periods of increased workload by documenting critical troubleshooting steps and providing on-call support for urgent service response obligations.

SKILLS

Equipment Support – Troubleshooting, Fault Diagnosis, Technical Escalation, Corrective Actions, Rotating Equipment, Pumps, Industrial Maintenance, Service Engineering

Technical Analysis – Diagnostic Skills, Data Interpretation, Fault Pattern Analysis, Equipment Behaviour Analysis, Root Cause Analysis

Customer & Stakeholder Support – Service Engineers, Field Support, Internal Teams, External Customers, Technical Communication, Knowledge Sharing

Software & Tools – Splunk, Dynatrace, Jira, Confluence, Linux Shell Scripting, Git

Programming & Scripting – Python, Java, SQL, Spring Boot, REST APIs

Cloud & Infrastructure – AWS (EC2, S3, Lambda), Docker

Data & Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling

PROJECTS

Industrial Pump Performance Monitoring System (HCL Technologies)

- Developed a **Python-based data pipeline** to ingest operational data from multiple pump installations, cleaning and transforming telemetry streams for analysis.
- Built interactive **Power BI dashboards** to visualize key performance indicators (KPIs) such as vibration levels, temperature, and flow rates, enabling proactive identification of ~20 potential equipment failures per quarter.
- Collaborated with operations teams to define alerting thresholds and reporting requirements, ensuring timely notification of anomalous equipment behaviour.

Automated Service Triage and Knowledge Base Enhancement (HCL Technologies)

- Engineered **Python scripts** to parse incoming support tickets and customer logs, automatically categorizing issues and suggesting relevant knowledge base articles.
- Integrated the scripting solution with **Jira and Confluence**, improving ticket routing efficiency by **22%** and reducing manual triage time for the support team.
- Documented and refined troubleshooting playbooks for common equipment faults, enhancing the knowledge base with **over 50 new entries**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
