PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed and improved a distributed set of **CI/CD pipelines** using **GitLab** and **TeamCity**, reducing execution failures by **18%** through proactive monitoring and automated remediation.
- Developed and maintained **Python** scripts for automating ETL processes and scheduled reporting, streamlining data ingestion for downstream analytical systems.
- Resolved production incidents and change requests within defined SLAs for enterprise applications, performing root-cause analysis and implementing long-term fixes to prevent recurrence.
- Supported and integrated with enterprise business systems, including ERP modules, coordinating change-control management and post-go-live support across interconnected platforms.
- Designed and implemented **REST APIs** in **Java Spring Boot** for cross-service data exchange, incorporating request validation and circuit-breaker patterns to enhance system resilience.
- Contributed to the evolution of DevOps practices by identifying recurring issues and implementing automation or structural improvements, eliminating approximately **30%** of manual operational checks.

SKILLS

DevOps & CI/CD – Python, Bash, PowerShell, CI/CD orchestration, TeamCity, GitLab, Apache Airflow, Octopus Deploy, Jenkins, Docker, Linux

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Kubernetes, Infrastructure as Code

Programming & Scripting – Python, Java, Spring Boot, REST APIs, SQL, Bash, PowerShell

Databases & Data Management – PostgreSQL, MySQL, Oracle, Data Warehousing, ETL, Data Pipelines

Operations & Monitoring – Production Support, Incident Response, Root Cause Analysis, Splunk, Dynatrace, Change Management, RBAC

Analytics & BI – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

PROJECTS

Automated Production Monitoring and Alerting System (HCL Technologies)

- Developed a **Python**-based automation framework to ingest logs from **Splunk** and **CloudWatch**, creating aggregated alerts for critical P1/P2 incidents impacting enterprise applications.
- Implemented scheduled reporting scripts that provided daily operational summaries to business analysts, reducing manual data compilation effort by an estimated **15 hours** per week.
- Configured **Jenkins** pipelines to deploy monitoring agents and update alert thresholds across a fleet of 50+ EC2 instances, improving deployment consistency.

Data Pipeline Optimization for Financial Reporting (HCL Technologies)

- Refactored existing **SQL** queries and introduced strategic indexing in **PostgreSQL**, reducing the execution time of key financial reconciliation reports by an average of **35%**.
- Built data transformation jobs using **Python** and **pandas** to clean and structure raw transaction data, ensuring compliance with data retention policies for audit trails.
- Collaborated with operations teams to define requirements for new data extraction needs, ensuring the pipelines met regulatory awareness standards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
