PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Investigated and analyzed special situations including **mergers** and **corporate actions**, providing timely opinions on breaking news impacting equity and options markets.
- Developed **Python scripts** to automate data extraction and reporting for financial event tracking, reducing manual effort by an estimated **30%**.
- Executed **stock valuation analysis** using financial models and market data, contributing to investment strategy development for a quantitative trading desk.
- Collaborated with **senior analysts** and **traders** to identify unique investment opportunities and refine trading strategies in a fast-paced environment.
- Managed **production support** for enterprise Java applications on AWS, resolving P1/P2 incidents and ensuring adherence to strict operational SLAs.
- Designed and implemented **REST APIs** using Java Spring Boot for seamless integration between financial data systems and analytical platforms.

SKILLS

Financial Analysis – Stock Valuation, Corporate Actions, Mergers & Acquisitions, Event Driven Analysis, Options

Programming & Scripting – Python, Java, Spring Boot, REST APIs, SQL

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Development Tools & Methodologies – Git, Jenkins, Jira, Agile, Scrum

Monitoring & Support – Splunk, Dynatrace, Incident Response, Production Support

PROJECTS

Event Tracking and Analysis Platform (HCL Technologies)

- Developed a **Python-based data pipeline** to ingest and process news feeds and corporate filings, enabling real-time tracking of market-moving events.
- Built **interactive dashboards in Power BI** to visualize event impact and historical trends, facilitating quicker analysis for the financial operations team.
- Integrated with **SQL databases (PostgreSQL)** to store and retrieve event data, supporting ad-hoc querying for deeper investigative analysis.

Quantitative Research Support System (HCL Technologies)

- Engineered **RESTful APIs using Java Spring Boot** to expose processed financial data for consumption by quantitative research models.
- Automated data validation and reconciliation workflows using **Python scripts**, ensuring data integrity for downstream algorithmic trading systems.
- Contributed to the CI/CD pipeline using **Jenkins and Git** for reliable deployment of backend services supporting research analysts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
