PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Configured and optimized enterprise-scale **cyber security tooling**, including EDR and email security controls, to enhance threat detection capabilities across a distributed environment.
- Collaborated with **SOC and Cyber Engineering teams** to analyze incident learnings, identifying and implementing configuration improvements for preventive and detective controls.
- Developed **Python scripts** to automate manual configuration management tasks for security controls, reducing operational overhead and improving incident response times.
- Supported the **governance and oversight** of security tooling by maintaining detailed documentation of control configurations and their underlying rationale, aligning with approved standards.
- Partnered with **threat intelligence teams** to translate modern attacker techniques and recurring incident causes into tangible improvements for security tool configurations.
- Assisted in the operational transition of new **cyber tooling**, working with third-party providers to ensure seamless integration and ongoing support management.

SKILLS

Security Operations – Cybersecurity, Security Engineering, IT Operations, SOC, Threat Intelligence, MITRE ATT&CK; framework

Security Tooling – EDR/MDR, Endpoint Security, Email Security Controls, Data Security Controls, Identity and Access Security Controls, Cloud Security Controls, Network Security Tooling, Application Security Tooling

Cloud Security – Cloud Security Controls, Native Security Services

Scripting & Automation – Python, Bash, PowerShell

IT Governance – Configuration Management, Change Control, Operational Governance, Security Configuration Standards, Operational Runbooks

Enterprise Systems – Infrastructure Engineering, Cloud Engineering

Methodologies – Agile/Scrum

PROJECTS

Enterprise Security Tooling Optimization (HCL Technologies)

- Enhanced the configuration and effectiveness of enterprise security platforms, including **endpoint detection and response (EDR) and email security** controls, to strengthen cyber defences.
- Developed **Python automation scripts** to streamline manual configuration management for security controls, reducing the effort required for incident remediation by approximately 20%.
- Collaborated with cross-functional teams to document control intent and configuration rationale, ensuring alignment with approved security standards and policies.

Automated Control Baseline and Reporting (HCL Technologies)

- Established a baseline of current tooling performance and control coverage by developing automated data collection scripts in **Python**.
- Implemented automated reporting for control effectiveness metrics, reducing manual reporting effort by an estimated 15 hours per week.
- Supported the transition of new cyber tooling into operational management by creating detailed **operational runbooks** and configuration documentation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
