PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed incident lifecycles for critical hospital systems across the EU, ensuring service restoration and adherence to SLAs by resolving an average of **18 critical incidents** per week.
- Supported and enhanced existing IT services for healthcare clients, performing root cause analysis on recurring issues and implementing **stable fixes** that improved system availability by **12%**.
- Developed Python scripts to automate data extraction and reporting for operational dashboards, reducing manual effort by **40%** and enabling faster decision-making for support teams.
- Collaborated with cross-functional teams to develop and implement continuous service improvement plans, contributing to a **15% reduction** in P1 incidents over a six-month period.
- Authored and maintained comprehensive knowledge base articles and troubleshooting guides for common software and hardware issues, aiming to deflect **~30%** of Level 1 support tickets.
- Participated in change management processes for system updates and configuration changes, ensuring smooth deployment and post-implementation support for enterprise applications.

SKILLS

IT Support & Operations – Incident Management, Service Request Management, Problem Management, Change Management, ITIL Framework, Production Support, SLA Management, Knowledge Base Development

Operating Systems – Linux, Windows Server

Scripting & Automation – Python, Shell Scripting

Databases – SQL, PostgreSQL, MySQL, Oracle

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker

Programming Languages – Java, Spring Boot

Monitoring & Observability – Splunk, Dynatrace

PROJECTS

Healthcare Application Support Enhancement (HCL Technologies)

- Engineered a Python-based automation solution to streamline log analysis for a key healthcare platform, reducing the time spent on diagnostic log parsing from **2 hours to 15 minutes**.
- Developed RESTful APIs using **Java Spring Boot** to facilitate cross-system communication between the core application and a new patient portal, supporting over **5,000 daily requests**.
- Implemented proactive monitoring alerts in **Splunk** for potential system failures, identifying and resolving **7 critical issues** before they impacted end-users.

IT Service Delivery Dashboard (MSc Project)

- Designed and built an interactive **Power BI** dashboard to visualize IT support ticket volume, resolution times, and key performance indicators for a simulated enterprise environment.
- Integrated data from multiple sources using **Power Query** and developed complex **DAX** measures to calculate service level adherence and identify support bottlenecks, presenting findings to stakeholders.
- Performed data modelling and ETL processes on a dataset of **~100,000 support tickets** to ensure data integrity and optimize dashboard performance.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
